اللَّهُمَّ لا سَهْلَ إِلَّا ما جَعَلْتَهُ سَهْلًا، وأنتَ تَجْعَلُ الحَزْنَ إذا شِئْتَ سَهْلًا — صلِّ على النبي ﷺ

LECTURE 1

Problems Arising from Population Growth

المشكلات الناتجة عن الزيادة السكانية

Part A · Past Exam Questions

أسئلة الدفعات السابقة

1.1 Natural increase in the context of population growth occurs when: — كويز 1 قضايا (ترم سابق)

a. Death rate is greater than the birth rate
b. Population decreases due to migration
c. Birth rate is greater than the death rate
d. Birth rate is equal to the death rate

1.2 Emigration can affect the population through: — كويز 1 قضايا (ترم سابق)

a. Decreasing the population size
b. Increasing the population size
c. Increasing the birth rate
d. No effect on population size

1.3 Early marriage among females impacts population growth due to: — كويز 1 قضايا (ترم سابق)

a. Increasing the birth rate by delaying reproduction
b. Shortening the reproductive period for women
c. Reducing the birth rate by delaying reproduction
d. Prolonging the reproductive period for women

1.4 Early childbirth and having a large number of children are considered important for women in rural areas because it: — كويز 1 قضايا (ترم سابق)

a. Improves living conditions
b. Ensures economic stability
c. Improves access to education
d. Protects against divorce

1.5 Egypt's population is distributed between urban and rural areas as: — كويز 1 قضايا (ترم سابق)

a. Urban 50%, rural 50%
b. Urban 39.7%, rural 60.3%
c. Urban 42.3%, rural 57.8%
d. Urban 49.7%, rural 50.3%

1.6 Egypt's population is primarily concentrated in: — كويز 1 قضايا (ترم سابق)

a. Nile Valley and Delta
b. Along the Red Sea coast
c. Sinai Peninsula
d. Oases and Western Desert

1.7 What is Egypt's global rank in terms of population size? — أسئلة سابقة

a. 10th
b. 20th
c. 16th
d. 5th

1.8 Which of the following countries has a larger population than Egypt in Africa? — أسئلة سابقة

a. Kenya and tanzania
b. Nigeria and Ethiopia
c. South Africa and senegal
d. Sudan and tunisia

أسئلة سابقة

1.9 What are the three main factors that contribute to population growth?

a. Births, deaths, and internal migration
b. Births, deaths, and external migration
c. Births, employment, and external migration
d. Deaths, health, and education

أسئلة سابقة

1.10 Which of the following is NOT a major component of population growth?

a. Birth Rate
b. Death Rate
c. Immigration & Emigration
d. Literacy Rate

أسئلة سابقة

1.11 What is meant by "natural increase" in the context of population growth?

a. When the birth rate is equal to the death rate
b. When the death rate is greater than the birth rate
c. When the birth rate is greater than the death rate
d. When the population decreases due to emigration

أسئلة سابقة

1.12 How is the population growth rate calculated?

a. (Birth Rate + Immigration) - (Death Rate + Emigration)
b. (Birth Rate - Death Rate) + Immigration
c. (Death Rate + Emigration) - (Birth Rate + Immigration)
d. (Immigration - Emigration) / (Birth Rate + Death Rate)

أسئلة سابقة

1.13 What is immigration in the context of population growth?

a. Leaving a country to settle elsewhere
b. Movement of individuals from one country to another, increasing the population
c. A decrease in the birth rate of a country
d. Migration out of a population to another region

أسئلة سابقة

1.14 How does emigration affect a population?

a. It increases the population size
b. It decreases the population size
c. It has no effect on population size
d. It increases the birth rate

أسئلة سابقة

1.15 Which of the following statements is true regarding population growth?

a. Only immigration affects the size of a population
b. Both immigration and emigration impact the size of a population
c. Emigration increases a country's population size
d. Immigration decreases a country's population size

أسئلة سابقة

1.16 Which of the following is a reason for high birth rates in rural areas and populations with lower levels of education?

a. Higher cost of raising children
b. Increased economic and social value of children
c. Lower levels of poverty
d. Reduced need for large families

1.17 How does early marriage among females impact population growth? أسئلة سابقة

a. It reduces the birth rate by delaying reproduction
b. It shortens the reproductive period for women
c. It prolongs the reproductive period and limits women's education
d. It increases women's continuation in education

1.18 In populations with lower education and higher poverty, what is one factor contributing to higher birth rates? أسئلة سابقة

a. Increased access to education
b. Decrease in the cost of raising children
c. Higher cost of child care
d. Decrease in the value of having children

1.19 Why are early childbirth and having a large number of children considered important for women in rural areas? أسئلة سابقة

a. It ensures economic stability
b. protection against divorce
c. It reduces the cost of raising children
d. It improves access to education for women

1.20 How does society's view of women contribute to rapid population growth, especially in rural areas? أسئلة سابقة

a. Women are encouraged to focus on higher education
b. Women are fully integrated into the workforce
c. Female illiteracy and lower educational levels push women toward domestic life and childbearing
d. Women are given more leadership roles

1.21 What is one reason for the preference for male offspring in rural areas? أسئلة سابقة

a. Male children are believed to reduce poverty
b. Male children are seen as having higher cultural value
c. Male children are considered less expensive to raise
d. Male children improve a woman's education opportunities

1.22 What is a cultural pattern contributing to rapid population growth in rural areas? أسئلة سابقة

a. Women are encouraged to delay marriage and childbirth
b. The belief that having more children ensures the survival of family traditions
c. The cultural emphasis on education for women
d. The preference for smaller family sizes

1.23 What is one outcome of the continued cultural preference for male offspring? أسئلة سابقة

a. Parents may keep having children until they have a male child
b. Families prefer to stop having children after the firstborn
c. It encourages female education and workforce participation
d. It leads to a decrease in birth rates

1.24 Why do many rural residents view family planning with suspicion? أسئلة سابقة

a. Due to its high cost
b. Due to a lack of understanding of modern health practices
c. Due to misconceptions and religious concerns
d. Because of government policies

1.25 How does a lack of proper understanding of religion contribute to rapid population growth? أسئلة سابقة

a. It encourages larger family sizes through religious teachings
b. It leads to dissatisfaction with family planning methods
c. It promotes equal use of family planning among rural and urban populations
d. It decreases the desire for children in rural areas

1.26 Where is Egypt's population primarily concentrated? أسئلة سابقة

a. Along the Red Sea coast
b. In the Nile Valley and Delta
c. In the Sinai Peninsula
d. In the Western Desert

1.27 What percentage of Egypt's total area is inhabited? أسئلة سابقة

a. 50%
b. 25%
c. 7.8%
d. 60%

1.28 How is Egypt's population distributed between urban and rural areas? أسئلة سابقة

a. 70% urban, 30% rural
b. 42.3% urban, 57.8% rural
c. 60% urban, 40% rural
d. 50% urban, 50% rural

1.29 What is the population of Egypt as of September 2024, according to Worldometer's elaboration of UN data? أسئلة سابقة

a. 110 million
b. 116,940,726
c. 120 million
d. 113,500,000

1.30 Egypt's population is equivalent to what percentage of the total world population? أسئلة سابقة

a. 2.5%
b. 1.43%
c. 3.1%
d. 0.9%

1.31 What is the population density of Egypt? أسئلة سابقة

a. 50 people per Km^2
b. 200 people per Km^2
c. 117 people per Km^2
d. 150 people per Km^2

1.32 What caused the expansion of the population pyramid base in Egypt? أسئلة سابقة

a. Decrease in fertility rates
b. Increase in the elderly population
c. Rapid increase in population size and high fertility rates until the mid-1980s
d. Decrease in birth rates since the 1980s

1.33 Why does the high percentage of children represent a burden on Egypt's economy? أسئلة سابقة

a. Children are part of the productive workforce
b. Children require resources for food, healthcare, and education
c. Children generate significant income for the country
d. Children contribute to reducing population growth

1.34 What percentage of females in the age group (12-64) participated in the labour force in 2018, according to CAPMAS? أسئلة سابقة

a. 25.5%
b. 40.2%
c. 18.3%
d. 30.1%

1.35 What is one key solution suggested for increasing female labour force participation in Egypt? أسئلة سابقة

a. Limiting women's education
b. Promoting male workforce participation
c. Improving job opportunities and promoting women's empowerment
d. Reducing healthcare services for women

1.36 Why does low female labour force participation require attention in Egypt? أسئلة سابقة

a. It increases dependency on the male workforce
b. It limits economic growth and women's empowerment
c. It reduces the population growth rate
d. It increases competition in the job market

1.37 How does increasing women's participation in the workforce benefit society? أسئلة سابقة

a. It leads to fewer job opportunities for men
b. It changes the perception of women's roles being limited to childbearing
c. It increases early marriage and childbearing
d. It decreases women's access to education

1.38 What was the unemployment rate in Egypt in 2018 according to population censuses? أسئلة سابقة

a. 7.5%
b. 9.9%
c. 12.3%
d. 5.4%

1.39 Why has the unemployment rate increased in recent years? أسئلة سابقة

a. Because of a decrease in population growth
b. Due to the community's inability to create new jobs matching the number of people joining the labour market
c. Because of a reduction in education opportunities
d. Due to more people moving to rural areas

1.40 What is a significant challenge caused by poor nutritional status among children in Egypt? أسئلة سابقة

a. Increased job opportunities
b. Growing food gap due to the Increased food consumption and rising food prices due to population growth
c. Decreased child population
d. Better access to healthcare

أسئلة سابقة

1.41 What did the Egypt Demographic and Health Survey (EDHS) in 2008 indicate about children's nutritional status?

a. Increased child obesity
b. Growth retardation due to lack of access to balanced food or chronic illness
c. Improved child nutrition across the country
d. Decreased rates of childhood illnesses

أسئلة سابقة

1.42 What is an example of growth retardation mentioned in the EDHS survey?

a. Obesity
b. Short stature or dwarfism in children
c. Increased body mass index (BMI)
d. Faster growth rates in rural areas

أسئلة سابقة

1.43 What percentage of Egypt's population was living in poverty in 2011?

a. 10%
b. 15%
c. 25%
d. 30%

أسئلة سابقة

1.44 Where is the poverty rate higher in Egypt?

a. In urban areas compared to rural areas
b. In the Delta compared to Upper Egypt
c. In rural areas compared to urban areas
d. In coastal regions compared to inland areas

أسئلة سابقة

1.45 Which area in Egypt experiences a higher poverty rate compared to others?

a. Delta
b. Upper Egypt
c. Coastal cities
d. Major urban centers

أسئلة سابقة

1.46 What is a primary reason for the increase in slums in Egypt?

a. Population decline
b. Migration from cities to rural areas
c. Migration from the countryside to the city
d. Increase in industrial development in rural areas

أسئلة سابقة

1.47 Why are slum residents in Egypt living in inhumane conditions?

a. They live in high-rise apartments
b. They lack basic facilities, suffer from poverty, and face unemployment
c. They have access to healthcare and education but no housing
d. They receive full government support for housing and jobs

أسئلة سابقة

1.48 What is one of the key challenges for the government in addressing slum growth?

a. Overpopulation in rural areas
b. The inability to provide suitable housing and job opportunities for migrants
c. Too many job opportunities in the cities
d. High levels of education among slum residents

1.49 What is Egypt's stable water share that has led to water poverty due to population growth? أسئلة سابقة

a. 40 billion cubic meters
b. 55.5 billion cubic meters
c. 70 billion cubic meters
d. 100 billion cubic meters

1.50 What critical issue does Egypt face as a result of population growth and water poverty? أسئلة سابقة

a. A decrease in housing availability
b. Difficulty in achieving food and water security
c. An increase in industrial development
d. A rise in international trade

1.51 What is one consequence of the decreasing per capita share of agricultural land in Egypt? أسئلة سابقة

a. Increased crop yields
b. Decreased need for food security
c. Limited food security due to limited land and water
d. Expansion of rural agricultural areas

1.52 What percentage of its food needs does Egypt import due to water poverty and the food gap? أسئلة سابقة

a. 50%
b. 60%
c. 70%
d. 80%

1.53 Why has Egypt increasingly relied on food imports? أسئلة سابقة

a. Decrease in population growth
b. Limited water and agricultural land, leading to a food gap
c. Increased domestic food production
d. Expansion of agricultural land

1.54 What is one primary consequence of population growth on primary education? أسئلة سابقة

a. Decrease in the number of schools
b. Increased density of students in classrooms
c. Decrease in the number of children of school age
d. Increase in the education budget

1.55 Why has the density of students in classrooms increased despite limitations in the education budget? أسئلة سابقة

a. Increased number of teachers
b. Decrease in the number of births
c. Increase in the number of school-age children due to higher birth rates
d. Reduction in classroom sizes

1.56 What impact does an increase in population have on crime rates? أسئلة سابقة

a. It leads to a decrease in violent crimes
b. It results in new forms and types of violent crimes
c. It eliminates social and economic problems
d. It has no effect on crime rates

1.57 What happens to the reliance on external sources for energy as the population increases? أسئلة سابقة

a. It decreases significantly
b. It remains constant
c. It increases due to a wider gap in energy needs
d. It is eliminated entirely

1.58 What is one potential consequence of increasing reliance on the outside world for energy needs? أسئلة سابقة

a. Decrease in energy costs
b. Improvement in quality of life
c. Increase in the bill that could have been used for quality of life improvements
d. Reduction in population growth

1.59 What dual responsibility do humans have regarding the environment? أسئلة سابقة

a. Polluting the environment and reducing resource consumption
b. Polluting the environment and protecting the environment
c. Protecting the environment and increasing population growth
d. None of the above

Part B · NCLEX-Style Practice

أسئلة على طريقة NCLEX (إضافة)

1.N1 Population growth rate is calculated as: NCLEX

a. (Births + immigration) – (deaths + emigration)
b. Births – deaths only
c. Deaths + emigration
d. Immigration ÷ births

1.N2 Natural increase occurs when: NCLEX

a. Death rate > birth rate
b. Birth rate > death rate
c. Emigration > immigration
d. Births = deaths

1.N3 Select ALL social factors behind high birth rates in rural Egypt. SELECT ALL

a. Economic and social value of children
b. Early marriage of females
c. Belief that many children protect against divorce
d. High level of female education
e. Misconceptions about religion and family planning

1.N4 Egypt's population is concentrated mainly in: NCLEX

a. Western Desert oases
b. Nile Valley and Delta
c. Sinai
d. Red Sea coast

1.N5 **Early marriage increases population growth because it:** NCLEX

a. Shortens the reproductive period
b. Prolongs the reproductive period and limits women's education
c. Delays reproduction
d. Has no effect

1.N6 **Emigration affects the population by:** NCLEX

a. Increasing its size
b. Decreasing its size
c. Raising birth rate
d. No effect

Part C · Quizlet Flashcards

كروت مراجعة سريعة

غطّي العمود الأبيض بورقة واختبر نفسك: شوف المصطلح وقول التعريف.

Growth rate	(Births + immigration) − (deaths + emigration).	**Natural increase**	Birth rate > death rate.
Immigration	Entering a country → population ↑.	**Emigration**	Leaving a country → population ↓.
Egypt rank	~16th worldwide; larger in Africa: Nigeria, Ethiopia.	**Distribution**	Nile Valley & Delta; urban ≈42%, rural ≈58%.
Rural high fertility	Children's economic value, early marriage, fear of divorce.	**Early marriage**	Prolongs reproductive period, limits education.
Cost of children	Low cost in poor areas → more births.	**Religious misconceptions**	Some view family planning as forbidden.
Effects	Pressure on services, unemployment, housing, environment.	**Not a component**	Literacy rate.

LECTURE 2

Reproductive Health & Family Planning

الصحة الإنجابية وتنظيم الأسرة

Part A · Past Exam Questions

أسئلة الدفعات السابقة

2.1 Long-acting contraceptive methods include: (كويز 1 قضايا (ترم سابق))

a. Skin patch
b. Vaginal ring
c. Oral contraceptive pills
d. Copper intrauterine device

2.2 Key benefits of spacing pregnancies at least two years apart include: (كويز 1 قضايا (ترم سابق))

a. Reducing the need for medical care
b. Improving maternal and child health outcomes
c. Decreasing birth weight
d. Increasing the risk of complications

2.3 The objective of reproductive health programs is to: (كويز 1 قضايا (ترم سابق))

a. Ensure safe motherhood and childbirth
b. Increase the global birth rate
c. Promote population control policies
d. Reduce access to family planning services

2.4 The permanent method of contraception is: (كويز 1 قضايا (ترم سابق))

a. Birth control patch
b. Subdermal implants
c. Tubal ligation
d. Injectable contraceptive

2.5 Which of the following is a key aspect of reproductive health? (كويز 1 قضايا (ترم سابق))

a. Providing access to contraceptives only
b. Ensuring individuals can have a satisfying and safe sex life
c. Reducing the global population
d. Preventing pregnancy only

2.6 What does reproductive health ensure? (أسئلة سابقة)

a. A satisfying and safe sexual life
b. Early pregnancy for all women
c. Childbirth at a young age
d. The elimination of family planning

2.7 Reproductive health includes: (أسئلة سابقة)

a. Physical and mental health only
b. Only physical health habits
c. Personal health, mental safety, and sexual activity
d. Only family planning decisions

2.8 Why is it important to provide reproductive health education to young people? أسئلة سابقة

a. To prepare them for pregnancy early
b. To inform them about safe, effective family planning
c. To avoid sexual health discussions
d. To encourage only childbearing women

2.9 Reproductive health affects: أسئلة سابقة

a. Only childbearing women
b. Men and women of all ages
c. Prenatal stages only
d. Only people in adolescence

2.10 What does reproductive health focus on, according to the International Conference on Population and Development? أسئلة سابقة

a. The prevention of reproductive diseases
b. Physical, mental, and social well-being related to the reproductive system
c. Avoiding diseases or disability
d. Childbearing age only

2.11 What is needed to achieve better reproductive health? أسئلة سابقة

a. Focus only on women's decisions
b. Involvement of both men and women in family decisions
c. Limiting decisions to married couples
d. Focus only on adolescent health

2.12 Reproductive health includes care for: أسئلة سابقة

a. Only childbearing women
b. Only prenatal stages
c. People at all life stages
d. Only early childhood stages

2.13 Family planning should be: أسئلة سابقة

a. Expensive and complex
b. Affordable and acceptable
c. Focused on men only
d. Provided for childbearing women only

2.14 What is one of the target categories of reproductive health services? أسئلة سابقة

a. Adolescents and youth to avoid harmful behaviors
b. Only men to improve their health
c. Children before adolescence
d. Only women of childbearing age

2.15 Reproductive health services include: أسئلة سابقة

a. Limited access to family planning
b. Providing high-quality family planning and infertility services
c. Preventing all types of pregnancy
d. Avoiding healthcare during childbirth

2.16 **Which group is provided care to prevent reproductive system diseases?** أسئلة سابقة

a. Adolescents and youth
b. Postnatal children
c. Women after childbearing age
d. Only men

2.17 **What does reproductive health aim to eliminate?** أسئلة سابقة

a. The need for family planning
b. Unsafe abortions
c. Childbirth in hospitals
d. All reproductive health services

2.18 **Regular check-ups and examinations are provided for:** أسئلة سابقة

a. Children and in premarital examinations
b. Only married women
c. Men only
d. Women after menopause

2.19 **What service is part of the reproductive health services package for women?** أسئلة سابقة

a. Only child health care
b. Postpartum and post-abortion care
c. Premarital examinations only
d. Only care for tumors

2.20 **What service is included for couples (men and women)?** أسئلة سابقة

a. Only child health
b. Comprehensive family planning
c. Services unrelated to sexual health
d. Postnatal care only

2.21 **Prevention and treatment of sexually transmitted infections are provided for:** أسئلة سابقة

a. Couples only
b. Only children
c. Both men and women
d. Only adolescents

2.22 **What is one key message of reproductive health?** أسئلة سابقة

a. Pre-marital care
b. Having many children early
c. Avoiding family planning
d. Limiting women's education

2.23 **What is the aim of pre-marital care?** أسئلة سابقة

a. Provide health education and interventions for those intending to marry
b. Avoid discussions about family planning
c. Promote early pregnancy without planning
d. Limit medical exams before marriage

2.24 **Delaying the birth of the first child helps:** أسئلة سابقة

a. Avoid responsibilities in marriage
b. Strengthen the couple's relationship and enhance stability
c. Prevent couples from adapting to married life
d. Focus only on work and avoid children

2.25 What does pre-marital care help couples plan for? أسئلة سابقة

a. A healthy pregnancy and childbirth
b. Immediate responsibilities and work
c. Avoiding all medical exams
d. Only the woman's health

2.26 Why is delaying the first child important for couples? أسئلة سابقة

a. To focus on early pregnancy
b. To adapt to new life and responsibilities
c. To avoid family planning
d. To have children immediately after marriage

2.27 What does pre-marital care provide to prevent transmission of infections? أسئلة سابقة

a. Only medical history
b. Counselling for infection prevention between spouses
c. Avoidance of health education
d. Only social interventions

2.28 What tests are conducted during pre-marital care? أسئلة سابقة

a. Only social assessments
b. Medical history and necessary tests
c. Physical fitness only
d. Mental health screenings only

2.29 What is one role of men in family planning? أسئلة سابقة

a. Avoid discussions about reproductive health
b. Participate in family planning decisions
c. Focus only on delaying pregnancy
d. Exclude women from decisions

2.30 What is one role of men in family planning? أسئلة سابقة

a. Adopt the concept of a small family
b. Only focus on their own health
c. Avoid discussions about family planning
d. Ignore reproductive health decisions

2.31 How should men participate in family planning? أسئلة سابقة

a. Make decisions alone
b. Encourage the wife to make family planning decisions
c. Ignore decisions about pregnancy
d. Limit discussions to economic matters

2.32 Why is pregnancy spacing important for mothers? أسئلة سابقة

a. It helps them physically and emotionally recover before the next pregnancy
b. It makes pregnancy occur more frequently
c. It focuses on the father's health
d. It delays caring for the new child

2.33 What impact does pregnancy spacing have on children? أسئلة سابقة

a. It improves their school performance
b. It reduces the time parents can spend with them
c. It delays their development
d. It weakens their health

2.34 Men's involvement in family planning helps: أسئلة سابقة

a. Change reproductive behavior and attitudes towards family planning
b. Limit discussions on economic problems
c. Focus only on women's health
d. Avoid decisions about childbirth

2.35 How does pregnancy spacing benefit parents? أسئلة سابقة

a. It gives them more time to care for their child and maintain relationships
b. It shortens the time parents spend with their children
c. It focuses only on financial benefits
d. It limits their involvement in childcare

2.36 What awareness should men have about the population problem? أسئلة سابقة

a. Its impact on the family and society's economic situation
b. That it does not affect their family
c. That it is only the wife's responsibility
d. That it only affects individual health

2.37 Pregnancy spacing helps reduce: أسئلة سابقة

a. The need for childcare
b. The incidence of abortion and unintended pregnancy
c. The health of the family
d. The role of men in family planning

2.38 What is child marriage? أسئلة سابقة

a. A union where one or both parties are under 18 years old
b. A union between people over 18 years old
c. A marriage with complete freedom of consent
d. A marriage where both parties are well-educated

2.39 Why is early marriage considered a form of forced marriage? أسئلة سابقة

a. Because it is always voluntary
b. Because one or both parties lack full freedom of consent
c. Because both parties are mature enough
d. Because the marriage is planned by the state

2.40 What is one social consequence of early marriage? أسئلة سابقة

a. Increase in education levels
b. Spread of domestic violence
c. Improvement in family relationships
d. Strengthening of the economy

2.41 Early marriage can lead to: أسئلة سابقة

a. Decline in education levels and spread of poverty
b. Better understanding of family dynamics
c. Fewer social problems
d. More economic opportunities for young people

2.42 What health issues are young mothers more likely to face? أسئلة سابقة

a. Anaemia and high blood pressure
b. Fewer complications during pregnancy
c. Lower risk of infections
d. Stronger emotional stability

2.43 Teenage mothers are more likely to experience: أسئلة سابقة

a. Postpartum depression compared to older mothers
b. Fewer mood swings and anxiety
c. No difficulties in concentrating or sleeping
d. Better mental health after childbirth

2.44 What is a potential consequence of early marriage on mental health? أسئلة سابقة

a. Difficulty concentrating, eating, and sleeping for one to two weeks
b. Improved focus and emotional well-being
c. Stronger relationships with family
d. No impact on mental health

2.45 What age group of mothers faces a higher likelihood of pregnancy-related complications? أسئلة سابقة

a. Mothers aged 10 to 19
b. Mothers over the age of 30
c. Mothers aged 20 to 25
d. All age groups equally

2.46 How does female education impact society? أسئلة سابقة

a. It contributes to the overall improvement of society
b. It limits women's role in family management
c. It only affects the individual's career
d. It has no effect on children's behavior

2.47 What is one benefit of educating women? أسئلة سابقة

a. It completely changes their perception and attitudes
b. It reduces their involvement in society
c. It limits their ability to manage families
d. It focuses only on career growth

2.48 Why should marriages between close relatives be limited? أسئلة سابقة

a. To avoid genetic diseases
b. To improve economic stability
c. To strengthen family ties
d. To promote cultural traditions

2.49 What did a study in Egypt find about the rate of congenital defects in newborns? أسئلة سابقة

a. 2-3% of all newborns had congenital defects
b. 10% of newborns had defects
c. No defects were found
d. 15% of newborns were free from defects

2.50 What percentage of child deaths in Egypt in 2008 were due to congenital defects at birth? أسئلة سابقة

a. 15%
b. 25%
c. 5%
d. 30%

2.51 What genetic issues were most common among children in the 2012 Egyptian study? أسئلة سابقة

a. Neurological diseases and defects in red blood cells
b. Only mental health issues
c. No genetic defects were reported
d. Respiratory problems

2.52 In families where first-degree kinship marriages occur, the incidence of genetic diseases can reach: أسئلة سابقة

a. 4% to 6%
b. Less than 1%
c. Only 2%
d. 10% or more

2.53 How do genetic diseases affect child mortality rates? أسئلة سابقة

a. They contribute to a significant portion of child and infant deaths
b. They have no impact on child deaths
c. They only affect elderly populations
d. They are not linked to any fatalities

2.54 What is family planning? أسئلة سابقة

a. A conscious and organized effort to regulate fertility
b. An automatic process with no planning
c. A government-imposed policy on childbirth
d. A service only available to married couples

2.55 What is one importance of family planning? أسئلة سابقة

a. Ability to determine the number of children and space pregnancies
b. To force couples to have children
c. To eliminate all pregnancies
d. To reduce the need for education

2.56 Family planning helps protect against: أسئلة سابقة

a. Unintended pregnancy
b. All health issues
c. Early marriage
d. None of the above

2.57 How does family planning benefit women? أسئلة سابقة

a. It provides better opportunities for education or work
b. It limits their career choices
c. It prevents them from managing their families
d. It has no impact on their opportunities

2.58 How does family planning save mothers' lives? أسئلة سابقة

a. By reducing the number of births and spacing pregnancies
b. By encouraging early pregnancies
c. By promoting larger families
d. By restricting access to healthcare

2.59 What does "unmet family planning needs" refer to? أسئلة سابقة

a. Women wanting to avoid pregnancy but not using family planning methods
b. Women not wishing to have children
c. Couples planning many pregnancies
d. A lack of children in families

2.60 How many women in developing countries wish to avoid pregnancy but do not use family planning? أسئلة سابقة

a. More than 100 million
b. Less than 10 million
c. About 50 million
d. None

2.61 What factors can contribute to unmet family planning needs? أسئلة سابقة

a. Various reasons, including lack of access to methods
b. Overabundance of family planning options
c. A strong desire for larger families
d. Limited healthcare access for men only

2.62 How does the World Health Organization (WHO) define maternal health? أسئلة سابقة

a. Women's safety during pregnancy, childbirth, and postpartum
b. Women's health at all ages
c. Only the health of the newborn
d. Health services available to men

2.63 What percentage of maternal deaths in developing countries is due to early or late pregnancy? أسئلة سابقة

a. Approximately 99%
b. About 50%
c. Less than 25%
d. Nearly 75%

2.64 What is the recommended age to wait before attempting pregnancy for the health of both mother and child? أسئلة سابقة

a. At least eighteen years old
b. At least sixteen years old
c. At least twenty-one years old
d. Any age is acceptable

2.65 How long should a woman wait after giving birth before attempting another pregnancy? أسئلة سابقة

a. At least two years
b. At least six months
c. At least one year
d. No waiting period is necessary

2.66 What increases the risks associated with childbirth as a woman ages? أسئلة سابقة

a. Increased likelihood of having children with autism or Down Syndrome
b. Fewer complications during childbirth
c. Reduced need for medical intervention
d. Higher fertility rates

2.67 What are some advantages of pregnancy spacing? أسئلة سابقة

a. Reducing infant and maternal mortality rates
b. Increasing birth rates
c. Raising the risk of health complications
d. None of the above

2.68 Why is family planning considered a cost-effective health intervention? أسئلة سابقة

a. It helps avoid costs associated with government services
b. It requires high levels of government funding
c. It focuses solely on increasing population
d. It does not require any resources

2.69 What are the potential global impacts of eliminating unmet contraceptive needs? أسئلة سابقة

a. Reduction of 640,000 neonatal deaths and 150,000 maternal deaths
b. Increase in maternal and neonatal deaths
c. No change in global health outcomes
d. Higher healthcare costs

2.70 What role do expenditures on population activities play in a country's progress? أسئلة سابقة

a. They are crucial indicators of implementing the ICPD action plan and achieving Sustainable Development Goals
b. They only impact economic growth
c. They are unrelated to health services
d. They only benefit certain age groups

2.71 How is access to family planning recognized globally? أسئلة سابقة

a. As a human right
b. As a privilege for the wealthy
c. As a cultural issue
d. As an optional service

2.72 What key document affirmed family planning as a human right? أسئلة سابقة

a. The International Conference on Population and Development (ICPD) in 1994
b. The Universal Declaration of Human Rights
c. The Cairo Declaration on Human Rights
d. The Sustainable Development Goals

2.73 What is the purpose of Egypt's National Strategy for Human Rights? أسئلة سابقة

a. To enhance social, economic, political, and cultural rights
b. To limit access to family planning services
c. To reduce governmental responsibilities
d. To focus solely on economic growth

2.74 What are short-acting hormonal methods of family planning? أسئلة سابقة

a. Methods that must be used daily, weekly, or monthly
b. Permanent methods of birth control
c. Methods that last for several years
d. Natural methods based on fertility awareness

2.75 What is an example of a long-acting hormonal method? أسئلة سابقة

a. The copper IUD
b. Oral contraceptives
c. The morning-after pill
d. Fertility awareness methods

2.76 What does sterilization refer to in family planning? أسئلة سابقة

a. A permanent method of birth control
b. A temporary method
c. An emergency contraceptive
d. A natural method

2.77 What do fertility awareness methods focus on? أسئلة سابقة

a. Knowing the days when pregnancy can occur
b. Using hormonal contraceptives
c. Emergency contraception
d. Sterilization techniques

2.78 What is an example of emergency contraception? أسئلة سابقة

a. The morning-after pill
b. Copper IUD
c. Tubal ligation
d. Fertility awareness methods

2.79 How do birth control methods primarily work? أسئلة سابقة

a. By preventing sperm from reaching the egg
b. By increasing fertility
c. By enhancing the chances of conception
d. By eliminating menstrual cycles

2.80 What is one way that birth control methods can prevent pregnancy? أسئلة سابقة

a. By changing the lining of the uterus
b. By promoting ovulation
c. By decreasing sperm production
d. By increasing the release of eggs

2.81 What must be done for any birth control method to be effective? أسئلة سابقة

a. It must be used consistently and correctly
b. It must be used only during ovulation
c. It must be administered by a partner
d. It must be changed frequently

2.82 Which methods require little effort from the user? أسئلة سابقة

a. IUDs and sterilization
b. Condoms and fertility awareness methods
c. Oral contraceptives
d. Natural family planning

2.83 What additional benefits can some birth control methods provide? أسئلة سابقة

a. Reducing blood flow during menstruation
b. Increasing the risk of infections
c. Making periods longer
d. Enhancing fertility

2.84 What factors can affect a woman's choice of birth control method over her lifetime? أسئلة سابقة

a. Age, health history, and number of desired children
b. Only her partner's preferences
c. The season of the year
d. The method's availability in her area

2.85 Why might the best method of birth control change for a woman? أسئلة سابقة

a. Because it is affected by various personal factors
b. Because all methods have the same effectiveness
c. Because new methods are developed frequently
d. Because social trends dictate preferences

2.86 How do some methods thicken cervical mucus? أسئلة سابقة

a. To make it difficult for sperm to pass through
b. To facilitate sperm movement
c. To prevent ovulation
d. To enhance egg quality

Part B · NCLEX-Style Practice

أسئلة على طريقة NCLEX (إضافة)

2.N1 The objective of reproductive health programs is to: NCLEX

a. Increase birth rate
b. Ensure safe motherhood and childbirth
c. Restrict family planning
d. Control population by force

2.N2 Which is a permanent contraceptive method? NCLEX

a. IUD
b. Implant
c. Tubal ligation
d. Pills

2.N3 Select ALL long-acting reversible contraceptives. SELECT ALL

a. Copper IUD
b. Subdermal implant
c. Hormonal IUD
d. Condom
e. Oral pills

2.N4 Spacing pregnancies at least two years apart mainly: NCLEX

a. Decreases birth weight
b. Improves maternal and child health
c. Increases complications
d. Has no benefit

2.N5 Family planning services should be: NCLEX

a. Expensive
b. Affordable and acceptable
c. For men only
d. Restricted

2.N6 Reproductive health means people can: NCLEX

a. Use contraceptives only
b. Have a satisfying and safe sex life and decide if/when to reproduce
c. Reduce the global population
d. Avoid pregnancy only

Part C · Quizlet Flashcards

كروت مراجعة سريعة

غطّي العمود الأبيض بورقة واختبر نفسك: شوف المصطلح وقول التعريف.

Reproductive health	Safe, satisfying sex life; capability to reproduce; freedom to decide.	**Program objective**	Safe motherhood and childbirth.
Family planning	Affordable, acceptable, accessible.	**Spacing**	≥2 years improves maternal & child health.
Permanent methods	Tubal ligation, vasectomy.	**LARC**	IUD, implants.
Short-acting	Pills, injectables, patch, ring, condoms.	**Copper IUD**	Long-acting non-hormonal.
Barriers	Misconceptions, low education, rural norms.	**Benefits**	Lower maternal/infant mortality, better family economy.

Unmet need	Women wanting to avoid pregnancy without using contraception.
Counseling	Informed choice of method.

LECTURE 3

Environmental System & Ecosystem

النظام البيئي والنظام الإيكولوجي

Part A · Past Exam Questions

أسئلة الدفعات السابقة

3.1 The primary role of producers in an ecosystem is to: كويز 2 قضايا

a. Consume other organisms
b. Decompose organic matter
c. Provide energy and nutrients
d. Regulate the climate

3.2 One of the following is considered a component of an ecosystem: كويز 2 قضايا

a. Biotic components
b. Closed system
c. Incomplete ecosystem
d. Open system

3.3 The study of living organisms in their natural habitats is called: كويز 2 قضايا

a. Biology
b. Environmental science
c. Ecology
d. Ecosystem

3.4 One of the components of the biological environment is: كويز 2 قضايا

a. Water
b. Soil
c. Humans
d. Air

3.5 The environmental system is defined as: كويز 2 قضايا

a. Only the non-living components
b. A system that only includes humans
c. An area of land and living organisms interacting
d. A type of ecosystem with no living organisms

3.6 What is the environment defined as? أسئلة سابقة

a. The surroundings of humans, encompassing material and non-material aspects.
b. A system limited to living organisms.
c. Physical infrastructure alone.
d. A natural habitat excluding human activities.

3.7 What are the two main types of environments? أسئلة سابقة

a. Biological and Physical
b. Natural and Constructed
c. Terrestrial and Aquatic
d. Social and Natural

3.8 What is part of the natural environment? أسئلة سابقة

a. Social systems and institutions
b. Living organisms, soil, and climate elements
c. Physical buildings and roads
d. Artificial agricultural fields

3.9 What is the constructed environment? أسئلة سابقة

a. Soil, plants, and natural resources
b. Oceans and river systems
c. Human-built infrastructure and social systems
d. Climate and atmospheric systems

3.10 Which type of environment includes living organisms within the biosphere? أسئلة سابقة

a. Social Environment
b. Constructed Environment
c. Biological Environment
d. Lithospheric Environment

3.11 What does the term "ecosystem" refer to? أسئلة سابقة

a. A system of living and non-living components interacting in an area.
b. A biological concept excluding humans.
c. Only land-based living organisms.
d. Artificial systems developed by humans.

3.12 Who first defined ecology in 1869? أسئلة سابقة

a. Charles Darwin
b. Ernst Haeckel
c. Louis Pasteur
d. Carl Linnaeus

3.13 What are the main components of an ecosystem? أسئلة سابقة

a. Producers, Consumers, Decomposers
b. Oceans, Forests, Deserts
c. Sunlight, Climate, Air
d. Soil, Rocks, Water

3.14 Which organisms are producers in an ecosystem? أسئلة سابقة

a. Herbivores
b. Plants and algae
c. Decomposers
d. Carnivores

3.15 What is the primary function of decomposers? أسئلة سابقة

a. Convert sunlight into energy
b. Break down dead organic matter
c. Consume primary consumers
d. Maintain atmospheric oxygen

3.16 What are primary consumers? أسئلة سابقة

a. Organisms feeding directly on plants
b. Animals consuming other carnivores
c. Decomposers of organic matter
d. Producers like plants

أسئلة سابقة

3.17 Which zone in saltwater ecosystems has the highest marine productivity?

a. Abyssal Zone
b. Continental Shelf
c. Intertidal Zone
d. Oceanic Depths

أسئلة سابقة

3.18 Where do estuaries occur?

a. Polar tundra regions
b. River mouths mixing with seawater
c. Tropical rainforest interiors
d. Desert oases

أسئلة سابقة

3.19 What is characteristic of tundra ecosystems?

a. Lush vegetation and forests
b. Dry, harsh winters with no trees
c. High annual rainfall
d. Transitional grasslands

أسئلة سابقة

3.20 Which forests are found in temperate zones?

a. Coniferous forests
b. Deciduous forests
c. Tropical rainforests
d. Mediterranean forests

أسئلة سابقة

3.21 What are tropical grasslands also called?

a. Savannas
b. Deserts
c. Prairies
d. Rainforests

أسئلة سابقة

3.22 What is the annual rainfall in deserts?

a. Less than 250 mm
b. Between 250–750 mm
c. More than 1000 mm
d. 500–1000 mm

أسئلة سابقة

3.23 Which ecosystem has limited productivity due to a lack of photosynthesis materials?

a. Continental Shelf
b. Intertidal Zone
c. Abyssal Zone
d. Estuaries

أسئلة سابقة

3.24 What is a closed ecosystem?

a. A system lacking sunlight for producers
b. An ecosystem containing all essential components
c. A freshwater-based natural system
d. A human-modified ecosystem

أسئلة سابقة

3.25 How do humans negatively affect grasslands?

a. By planting new vegetation
b. By overutilization leading to soil degradation
c. By improving grazing patterns
d. By preventing climate changes

أسئلة سابقة

3.26 What impact does air pollution have on plants?

a. Increases photosynthesis efficiency
b. Reduces crop growth and plant maturity
c. Enhances oxygen production
d. Improves soil nutrient absorption

3.27 What causes respiratory diseases in humans due to environmental pollution? أسئلة سابقة

a. Increase in dust and fog
b. Excess plant growth
c. Low humidity
d. Moderate temperatures

3.28 What is the impact of fluoride compounds on animals? أسئلة سابقة

a. Rickets and bone problems
b. Enhanced immunity
c. Improved tissue regeneration
d. Reduced grazing behavior

3.29 What do rivers transport in freshwater ecosystems? أسئلة سابقة

a. Saltwater components
b. Organic materials ensuring nutrition
c. Air particles for photosynthesis
d. Carbon dioxide only

3.30 Which forest type depends on dry conditions with moderate winter rainfall? أسئلة سابقة

a. Coniferous forests
b. Mediterranean forests
c. Tropical rainforests
d. Deciduous forests

Part B · NCLEX-Style Practice

أسئلة على طريقة NCLEX (إضافة)

3.N1 The study of living organisms in their natural habitats is: NCLEX

a. Biology
b. Ecology
c. Geology
d. Climatology

3.N2 Producers in an ecosystem are: NCLEX

a. Animals that eat plants
b. Green plants that provide energy and nutrients
c. Decomposers
d. Predators

3.N3 Select ALL abiotic components of an ecosystem. SELECT ALL

a. Water
b. Soil
c. Temperature
d. Plants
e. Light

3.N4 Decomposers such as bacteria and fungi: NCLEX

a. Produce oxygen
b. Break down dead organic matter and recycle nutrients
c. Eat only plants
d. Are top predators

3.N5 Air pollution with dust and smoke affects plants by: NCLEX

a. Increasing photosynthesis
b. Reducing sunlight and crop growth
c. Enhancing maturity
d. Improving soil

3.N6 **Which forest type depends on dry summers and moderate winter rainfall?** NCLEX

a. Tropical rainforest
b. Coniferous
c. Mediterranean
d. Deciduous

Part C · Quizlet Flashcards

كروت مراجعة سريعة

غطّي العمود الأبيض بورقة واختبر نفسك: شوف المصطلح وقول التعريف.

Environment	Everything surrounding living organisms.	**Types**	Natural vs human-made.
Ecosystem	Area where living organisms interact with non-living components.	**Biotic**	Producers, consumers, decomposers (humans part of biological env.).
Abiotic	Soil, water, air, climate elements.	**Producers**	Green plants — provide energy & nutrients.
Consumers	Herbivores, carnivores, apex predators.	**Decomposers**	Bacteria, fungi — recycle nutrients.
Ecology	Study of organisms in natural habitats.	**Mediterranean forests**	Dry summer, winter rainfall.
Pollution effect on plants	Reduced growth/maturity.	**Fluoride on animals**	Rickets and bone problems.

LECTURE 4

Desertification & Sustainable Development

التصحر والتنمية المستدامة

Part A · Past Exam Questions

أسئلة الدفعات السابقة

Part B · NCLEX-Style Practice

أسئلة على طريقة NCLEX (إضافة)

4.N1 Desertification is defined as: NCLEX

a. Temporary drop in rainfall
b. Decline of land's biological productivity leading to desert-like conditions
c. Planting trees in deserts
d. Flooding

4.N2 Severe desertification is characterized by: NCLEX

a. No effect on productivity
b. 10% decline only
c. Vegetation deterioration by 50% with spread of harmful plants
d. Formation of rivers

4.N3 Select ALL human causes of desertification. SELECT ALL

a. Overgrazing and over-exploitation of soil
b. Forest removal
c. Mismanagement of water resources
d. Urban encroachment on agricultural land
e. Volcanic eruptions

4.N4 Which is a strategy to combat desertification? NCLEX

a. Deep ploughing
b. Windbreaks and stabilizing plants to fix dunes
c. Overgrazing
d. Deforestation for fuel

4.N5 Sustainable development means: NCLEX

a. Using all resources now
b. Meeting present needs without compromising future generations
c. Stopping all development
d. Only industrial growth

4.N6 Soil salinity as a manifestation of desertification results from: NCLEX

a. Excess vegetation
b. Loss of nutrients and poor drainage
c. Heavy forest cover
d. Sand dunes only

Part C · Quizlet Flashcards

كروت مراجعة سريعة

غطّي العمود الأبيض بورقة واختبر نفسك: شوف المصطلح وقول التعريف.

Desertification	Decline of land's biological productivity.	**Drought**	Temporary water shortage.
UN categories	Mild, moderate (10%), severe (50%), very severe.	**Natural causes**	Climate, recurrent drought.
Human causes	Overexploitation, deforestation, poor water management, urban encroachment.	**Manifestations**	Moving dunes, soil erosion, soil salinity.
Combating	Modern irrigation, technology, terracing, windbreaks, reclaim saline land, pasture & forest conservation.	**Sustainable development**	Meets present needs without compromising future generations.
Aim	Protect resources from irresponsible exploitation.	**Renewable resources**	Use without depletion.
Erosion	Loss of fertile topsoil.	**Salinity**	Loss of nutrients → low productivity.

LECTURE 5

Environmental Pollution Problems

مشكلات التلوث البيئي

Part A · Past Exam Questions

أسئلة الدفعات السابقة

5.1 The largest contributor to air pollution is: كويز 2 قضايا

a. Forest fires
b. Chemical plants
c. Fuel combustion
d. Dust storms

5.2 One of the harmful effects of increased toxic gases in the environment is: كويز 2 قضايا

a. Respiratory diseases
b. Improved air quality
c. Increased plant growth
d. Decreased soil fertility

5.3 The quantity and quality of pollutants that exceed the critical ecological threshold is: كويز 2 قضايا

a. Hazardous pollution
b. Destructive pollution
c. Normal pollution
d. Acceptable pollution

5.4 The most widespread form of environmental pollution is: كويز 2 قضايا

a. Soil
b. Radioactive
c. Air
d. Water

5.5 The percentage of African diseases resulting from environmental pollution is: كويز 2 قضايا

a. 28%
b. 20%
c. 27%
d. 25%

5.6 What is the primary objective of learning about environmental pollution? أسئلة سابقة

a. To understand its causes and impacts on the planet
b. To reduce all human activity globally
c. To increase pollution levels in urban areas
d. To build more industries

5.7 How does pollution primarily affect the ecosystem? أسئلة سابقة

a. It improves biodiversity
b. It disturbs the balance and stability
c. It promotes plant growth
d. It supports wildlife conservation

5.8 Which of the following activities directly leads to pollution? أسئلة سابقة

a. Use of renewable energy
b. Proper waste disposal
c. Industrial emissions
d. Planting trees

5.9 What is the main link between pollution and human activities? أسئلة سابقة

a. Pollution only comes from nature
b. Human activities generate pollutants
c. Human actions cannot affect the environment
d. Pollution is unrelated to human actions

5.10 What does “harmless pollution” mean in the text? أسئلة سابقة

a. Pollution that has no major impact
b. Pollution caused by humans and animals
c. Pollution that affects future generations
d. Pollution that completely destroys ecosystems

5.11 Which environmental factor is most affected by pollution? أسئلة سابقة

a. Language and culture
b. Air, water, and soil
c. Economic growth
d. Communication systems

5.12 What type of pollution results in harm to ecosystems over a short period? أسئلة سابقة

a. Harmless pollution
b. Airborne pollution
c. Destructive pollution
d. Soil erosion

5.13 According to the text, what is one way to protect the environment? أسئلة سابقة

a. Promoting awareness and recycling waste
b. Encouraging rapid industrialization
c. Increasing deforestation
d. Limiting scientific research

5.14 What major disaster is an example of destructive pollution? أسئلة سابقة

a. The Industrial Revolution
b. The Chernobyl incident
c. The Green Revolution
d. Natural disasters like hurricanes

5.15 What is a key takeaway about the relationship between pollution and human health? أسئلة سابقة

a. Pollution has no direct impact on health
b. Pollution is primarily beneficial to health
c. Pollution increases diseases and risks to well-being
d. Pollution leads to economic growth only

5.16 What is the main cause of air pollution? أسئلة سابقة

a. Industrial emissions and vehicle exhaust
b. Excessive tree planting
c. Increased oxygen production
d. Reduced fossil fuel use

5.17 Which of the following is a major consequence of air pollution? أسئلة سابقة

a. Improved air quality
b. Increased respiratory diseases
c. Higher crop yield
d. Stabilized climate patterns

5.18 What is a major source of water pollution? أسئلة سابقة

a. Use of clean energy sources
b. Untreated sewage and industrial waste
c. Recycling of wastewater
d. Agricultural water management

5.19 How does water pollution primarily affect humans and animals? أسئلة سابقة

a. By promoting clean drinking water
b. By increasing disease risks
c. By improving aquatic ecosystems
d. By reducing marine biodiversity

5.20 Which human activity contributes most to soil pollution? 1 أسئلة سابقة

a. Excessive use of fertilizers and pesticides
b. Organic farming practices
c. Planting cover crops
d. Natural soil enrichment

5.21 What is one consequence of soil pollution on agriculture? أسئلة سابقة

a. Increased soil fertility
b. Higher crop productivity
c. Contamination of food crops
d. Enhanced soil preservation

5.22 Which of the following pollutants is associated with industrial air emissions? أسئلة سابقة

a. Oxygen
b. Nitrogen oxides and sulfur dioxide
c. Clean water vapor
d. Carbon-free compounds

5.23 What happens when untreated wastewater enters water bodies? أسئلة سابقة

a. It enhances aquatic life
b. It purifies the water naturally
c. It causes contamination and diseases
d. It increases oxygen content in water

5.24 Why is soil erosion considered a serious issue? أسئلة سابقة

a. It reduces water pollution
b. It improves the soil's nutrients
c. It removes the top fertile layer of soil
d. It encourages plant growth

5.25 How does air pollution affect the environment? أسئلة سابقة

a. It helps regulate the climate
b. It causes acid rain and smog formation
c. It improves the water cycle
d. It increases green vegetation

5.26 What is the main cause of radioactive pollution? أسئلة سابقة

a. Industrial emissions
b. Excessive use of pesticides
c. Nuclear tests and radioactive waste
d. Sewage water discharge

5.27 What is one major health impact of radiation pollution? أسئلة سابقة

a. Improved immune systems
b. Cell damage and cancer risks
c. Enhanced lung capacity
d. Reduced risk of diseases

5.28 How does radiation pollution affect water bodies? أسئلة سابقة

a. It purifies water naturally
b. It contaminates water and harms marine life
c. It increases aquatic oxygen levels
d. It enhances fish reproduction

5.29 What type of pollution occurs due to radioactive emissions? أسئلة سابقة

a. Air pollution only
b. Soil, air, and water pollution
c. Noise pollution
d. Light pollution

5.30 What are common sources of radioactive pollution? أسئلة سابقة

a. Household waste and vehicle emissions
b. Nuclear energy plants and radioactive medical waste
c. Use of organic fertilizers
d. Wind energy production

5.31 What is the impact of radioactive pollution on plants? أسئلة سابقة

a. Increased plant growth
b. Enhanced photosynthesis
c. Genetic mutations and plant death
d. Enrichment of soil nutrients

5.32 Which of the following can help reduce pollution? أسئلة سابقة

a. Encouraging waste recycling
b. Increasing industrial emissions
c. Reducing the use of clean energy
d. Cutting down forests for land

5.33 What is a key method to control pollution as shown in the text? أسئلة سابقة

a. Use of renewable energy and planting trees
b. Increasing chemical usage in agriculture
c. Promoting urbanization without limits
d. Burning fossil fuels excessively

5.34 How does radioactive pollution impact human blood? أسئلة سابقة

a. It increases oxygen levels
b. It causes blood disorders and reduces immunity
c. It strengthens blood cells
d. It has no effect on the blood

5.35 What is a major way to save the environment from pollution? أسئلة سابقة

a. Limiting waste generation and promoting recycling
b. Using more fossil fuels
c. Increasing nuclear testing
d. Promoting plastic usage

Part B · NCLEX-Style Practice

أسئلة على طريقة NCLEX (إضافة)

5.N1 The most widespread form of environmental pollution is: NCLEX

a. Soil
b. Air
c. Noise
d. Radioactive

5.N2 The largest contributor to air pollution is: NCLEX

a. Dust storms
b. Fuel combustion
c. Volcanoes
d. Forest fires

5.N3 Select ALL health effects of air pollution. SELECT ALL

a. Respiratory diseases
b. Cardiovascular diseases
c. Eye irritation
d. Lung cancer
e. Improved immunity

5.N4 Pollution that exceeds the critical ecological threshold is called: NCLEX

a. Acceptable
b. Normal
c. Hazardous
d. Harmless

5.N5 Which individual action reduces pollution? NCLEX

a. Burning waste
b. Using public transportation
c. Using plastic bags frequently
d. Wasting electricity

5.N6 Water pollution most commonly causes: NCLEX

a. Waterborne diseases such as diarrhea and hepatitis A
b. Asthma only
c. Skin tanning
d. Hearing loss

Part C · Quizlet Flashcards

كروت مراجعة سريعة

غطّي العمود الأبيض بورقة واختبر نفسك: شوف المصطلح وقول التعريف.

Pollution	Any change in environment harmful to living organisms.	**Main source**	Human activities (industry, transport).
Most widespread	Air pollution.	**Largest air contributor**	Fuel combustion.

Levels	Acceptable/harmless, hazardous, destructive.	**Hazardous**	Exceeds critical ecological threshold.
Types	Air, water, soil, noise, radioactive, food.	**Health effects**	Respiratory, cardiovascular, cancers, waterborne disease.
Africa	~28% of diseases from environmental pollution.	**Ecosystem effect**	Disturbs balance and stability.
Prevention	Waste management, renewable energy, public transport, recycling.	**Nurse role**	Health education, advocacy, screening.

Answer Key — All Lectures

الإجابات

1.1. c — Birth rate is greater than the death rate

1.2. a — Decreasing the population size

1.3. d — Prolonging the reproductive period for women

1.4. d — Protects against divorce

1.5. c — Urban 42.3%, rural 57.8%

1.6. a — Nile Valley and Delta

1.7. c — 16th

1.8. b — Nigeria and Ethiopia

1.9. b — Births, deaths, and external migration

1.10. d — Literacy Rate

1.11. c — When the birth rate is greater than the death rate

1.12. a — (Birth Rate + Immigration) - (Death Rate + Emigration)

1.13. b — Movement of individuals from one country to another, increasing the population

1.14. b — It decreases the population size

1.15. b — Both immigration and emigration impact the size of a population

1.16. b — Increased economic and social value of children

1.17. c — It prolongs the reproductive period and limits women's education

1.18. b — Decrease in the cost of raising children

1.19. b — protection against divorce

1.20. c — Female illiteracy and lower educational levels push women toward domestic life and childbearing

1.21. b — Male children are seen as having higher cultural value

1.22. b — The belief that having more children ensures the survival of family traditions

1.23. a — Parents may keep having children until they have a male child

1.24. c — Due to misconceptions and religious concerns

1.25. b — It leads to dissatisfaction with family planning methods

1.26. b — In the Nile Valley and Delta

1.27. c — 7.8%

1.28. b — 42.3% urban, 57.8% rural

1.29. b — 116,940,726

1.30. b — 1.43%

1.31. c — 117 people per Km^2

1.32. c — Rapid increase in population size and high fertility rates until the mid-1980s

1.33. b — Children require resources for food, healthcare, and education

1.34. c — 18.3%

1.35. c — Improving job opportunities and promoting women's empowerment

1.36. b — It limits economic growth and women's empowerment

1.37. b — It changes the perception of women's roles being limited to childbearing

1.38. b — 9.9%

1.39. b — Due to the community's inability to create new jobs matching the number of people joining the labour market

1.40. b — Growing food gap due to the Increased food consumption and rising food prices due to population growth

1.41. b — Growth retardation due to lack of access to balanced food or chronic illness

1.42. b — Short stature or dwarfism in children

1.43. c — 25%

1.44. c — In rural areas compared to urban areas

1.45. b — Upper Egypt

1.46. c — Migration from the countryside to the city

1.47. b — They lack basic facilities, suffer from poverty, and face unemployment

1.48. b — The inability to provide suitable housing and job opportunities for migrants

1.49. b — 55.5 billion cubic meters

1.50. b — Difficulty in achieving food and water security

1.51. c — Limited food security due to limited land and water

1.52. d — 80%

1.53. b — Limited water and agricultural land, leading to a food gap

1.54. b — Increased density of students in classrooms

1.55. c — Increase in the number of school-age children due to higher birth rates

1.56. b — It results in new forms and types of violent crimes

1.57. c — It increases due to a wider gap in energy needs

1.58. c — Increase in the bill that could have been used for quality of life improvements

1.59. b — Polluting the environment and protecting the environment

1.N1. a — (Births + immigration) − (deaths + emigration)
The three components are births, deaths and migration.

1.N2. b — Birth rate > death rate
Natural increase = births minus deaths, ignoring migration.

1.N3. a, b, c, e — Economic and social value of children; Early marriage of females; Belief that many children protect against divorce; Misconceptions about religion and family planning
Education of women lowers fertility.

1.N4. b — Nile Valley and Delta
Most Egyptians live on a small fraction of land along the Nile.

1.N5. b — Prolongs the reproductive period and limits women's education
Longer exposure to pregnancy plus less education.

1.N6. b — Decreasing its size
Emigrants leave the country.

2.1. d — Copper intrauterine device

2.2. b — Improving maternal and child health outcomes

2.3. a — Ensure safe motherhood and childbirth

2.4. c — Tubal ligation

2.5. b — Ensuring individuals can have a satisfying and safe sex life

2.6. a — A satisfying and safe sexual life

2.7. c — Personal health, mental safety, and sexual activity

2.8. b — To inform them about safe, effective family planning

2.9. b — Men and women of all ages

2.10. b — Physical, mental, and social well-being related to the reproductive system

2.11. b — Involvement of both men and women in family decisions

2.12. c — People at all life stages

2.13. b — Affordable and acceptable

2.14. a — Adolescents and youth to avoid harmful behaviors

2.15. b — Providing high-quality family planning and infertility services

2.16. c — Women after childbearing age

2.17. b — Unsafe abortions

2.18. a — Children and in premarital examinations

2.19. b — Postpartum and post-abortion care

2.20. b — Comprehensive family planning

2.21. c — Both men and women

2.22. a — Pre-marital care

2.23. a — Provide health education and interventions for those intending to marry

2.24. b — Strengthen the couple's relationship and enhance stability

2.25. a — A healthy pregnancy and childbirth

2.26. b — To adapt to new life and responsibilities

2.27. b — Counselling for infection prevention between spouses

2.28. b — Medical history and necessary tests

2.29. b — Participate in family planning decisions

2.30. a — Adopt the concept of a small family

2.31. b — Encourage the wife to make family planning decisions

2.32. a — It helps them physically and emotionally recover before the next pregnancy

2.33. a — It improves their school performance

2.34. a — Change reproductive behavior and attitudes towards family planning

2.35. a — It gives them more time to care for their child and maintain relationships

2.36. a — Its impact on the family and society's economic situation

2.37. b — The incidence of abortion and unintended pregnancy

2.38. a — A union where one or both parties are under 18 years old

2.39. b — Because one or both parties lack full freedom of consent

2.40. b — Spread of domestic violence

2.41. a — Decline in education levels and spread of poverty

2.42. a — Anaemia and high blood pressure

2.43. a — Postpartum depression compared to older mothers

2.44. a — Difficulty concentrating, eating, and sleeping for one to two weeks

2.45. a — Mothers aged 10 to 19

2.46. a — It contributes to the overall improvement of society

2.47. a — It completely changes their perception and attitudes

2.48. a — To avoid genetic diseases

2.49. a — 2-3% of all newborns had congenital defects

2.50. a — 15%

2.51. a — Neurological diseases and defects in red blood cells

2.52. a — 4% to 6%

2.53. a — They contribute to a significant portion of child and infant deaths

2.54. a — A conscious and organized effort to regulate fertility

2.55. a — Ability to determine the number of children and space pregnancies

2.56. a — Unintended pregnancy

2.57. a — It provides better opportunities for education or work

2.58. a — By reducing the number of births and spacing pregnancies

2.59. a — Women wanting to avoid pregnancy but not using family planning methods

2.60. a — More than 100 million

2.61. a — Various reasons, including lack of access to methods

2.62. a — Women's safety during pregnancy, childbirth, and postpartum

2.63. a — Approximately 99%

2.64. a — At least eighteen years old

2.65. a — At least two years

2.66. a — Increased likelihood of having children with autism or Down Syndrome

2.67. a — Reducing infant and maternal mortality rates

2.68. a — It helps avoid costs associated with government services

2.69. a — Reduction of 640,000 neonatal deaths and 150,000 maternal deaths

2.70. a — They are crucial indicators of implementing the ICPD action plan and achieving Sustainable Development Goals

2.71. a — As a human right

2.72. a — The International Conference on Population and Development (ICPD) in 1994

2.73. a — To enhance social, economic, political, and cultural rights

2.74. a — Methods that must be used daily, weekly, or monthly

2.75. a — The copper IUD

2.76. a — A permanent method of birth control

2.77. a — Knowing the days when pregnancy can occur

2.78. a — The morning-after pill

2.79. a — By preventing sperm from reaching the egg

2.80. a — By changing the lining of the uterus

2.81. a — It must be used consistently and correctly

2.82. a — IUDs and sterilization

2.83. a — Reducing blood flow during menstruation

2.84. a — Age, health history, and number of desired children

2.85. a — Because it is affected by various personal factors

2.86. a — To make it difficult for sperm to pass through

2.N1. b — Ensure safe motherhood and childbirth
Reproductive health includes safe pregnancy, childbirth and a safe sex life.

2.N2. c — Tubal ligation
Tubal ligation and vasectomy are permanent.

2.N3. a, b, c — Copper IUD; Subdermal implant; Hormonal IUD
Pills and condoms are short-acting.

2.N4. b — Improves maternal and child health
Adequate spacing lowers maternal and infant morbidity and mortality.

2.N5. b — Affordable and acceptable
Accessibility and acceptability increase use.

2.N6. b — Have a satisfying and safe sex life and decide if/when to reproduce
WHO definition of reproductive health.

3.1. c — Provide energy and nutrients
كويز 2 فيه كمان أسئلة عن التلوث والتغير المناخي — اتشالت لأنها محاضرات مش في القائمة. أسئلة حقوق الإنسان من كويز 1 كمان اتشالت.

3.2. a — Biotic components

3.3. c — Ecology

3.4. c — Humans

3.5. c — An area of land and living organisms interacting

3.6. a — The surroundings of humans, encompassing material and non-material aspects.

3.7. b — Natural and Constructed

3.8. b — Living organisms, soil, and climate elements

3.9. c — Human-built infrastructure and social systems

3.10. c — Biological Environment

3.11. a — A system of living and non-living components interacting in an area.

3.12. b — Ernst Haeckel

3.13. a — Producers, Consumers, Decomposers

3.14. b — Plants and algae

3.15. b — Break down dead organic matter

3.16. a — Organisms feeding directly on plants

3.17. c — Intertidal Zone

3.18. b — River mouths mixing with seawater

3.19. b — Dry, harsh winters with no trees

3.20. b — Deciduous forests

3.21. a — Savannas

3.22. a — Less than 250 mm

3.23. c — Abyssal Zone

3.24. a — A system lacking sunlight for producers

3.25. b — By overutilization leading to soil degradation

3.26. b — Reduces crop growth and plant maturity

3.27. a — Increase in dust and fog

3.28. a — Rickets and bone problems

3.29. b — Organic materials ensuring nutrition

3.30. b — Mediterranean forests

3.N1. b — Ecology
Ecology studies interactions between organisms and their environment.

3.N2. b — Green plants that provide energy and nutrients
Producers (autotrophs) make food by photosynthesis.

3.N3. a, b, c, e — Water; Soil; Temperature; Light
Plants are biotic.

3.N4. b — Break down dead organic matter and recycle nutrients
They return nutrients to the soil.

3.N5. b — Reducing sunlight and crop growth
Less sunlight reaches leaves, reducing growth.

3.N6. c — Mediterranean
Mediterranean forests grow with winter rain.

4.N1. b — Decline of land's biological productivity leading to desert-like conditions
Drought is temporary; desertification is degradation of productive land.

4.N2. c — Vegetation deterioration by 50% with spread of harmful plants
UN classes: mild, moderate (10%), severe (50%), very severe (dunes, salinization).

4.N3. a, b, c, d — Overgrazing and over-exploitation of soil; Forest removal; Mismanagement of water resources; Urban encroachment on agricultural land
Volcanoes are natural events.

4.N4. b — Windbreaks and stabilizing plants to fix dunes
Others: modern irrigation, terracing, reclaiming saline land, pasture and forest conservation.

4.N5. b — Meeting present needs without compromising future generations
Brundtland definition.

4.N6. b — Loss of nutrients and poor drainage
Salinity degrades soil quality and productivity.

5.1. c — Fuel combustion

5.2. a — Respiratory diseases

5.3. a — Hazardous pollution
إجابات كويز 2 من اختيارات الطالب في الصورة.أسئلة التغير المناخي في الكويز اتشالت (مش في منهج الميدترم).

5.4. c — Air

5.5. a — 28%

5.6. a — To understand its causes and impacts on the planet

5.7. b — It disturbs the balance and stability

5.8. c — Industrial emissions

5.9. b — Human activities generate pollutants

5.10. a — Pollution that has no major impact

5.11. b — Air, water, and soil

5.12. c — Destructive pollution

5.13. a — Promoting awareness and recycling waste

5.14. b — The Chernobyl incident

5.15. c — Pollution increases diseases and risks to well-being

5.16. a — Industrial emissions and vehicle exhaust

5.17. b — Increased respiratory diseases

5.18. b — Untreated sewage and industrial waste

5.19. b — By increasing disease risks

5.20. a — Excessive use of fertilizers and pesticides

5.21. c — Contamination of food crops

5.22. b — Nitrogen oxides and sulfur dioxide

5.23. c — It causes contamination and diseases

5.24. c — It removes the top fertile layer of soil

5.25. b — It causes acid rain and smog formation

5.26. c — Nuclear tests and radioactive waste

5.27. b — Cell damage and cancer risks

5.28. b — It contaminates water and harms marine life

5.29. b — Soil, air, and water pollution

5.30. b — Nuclear energy plants and radioactive medical waste

5.31. c — Genetic mutations and plant death

5.32. a — Encouraging waste recycling

5.33. a — Use of renewable energy and planting trees

5.34. b — It causes blood disorders and reduces immunity

5.35. a — Limiting waste generation and promoting recycling

5.N1. b — Air
Air pollution affects the largest number of people.

5.N2. b — Fuel combustion
Burning fossil fuels in vehicles, industry and power plants.

5.N3. a, b, c, d — Respiratory diseases; Cardiovascular diseases; Eye irritation; Lung cancer
Pollution harms multiple systems.

5.N4. c — Hazardous
Levels of pollution: acceptable, hazardous, destructive.

5.N5. b — Using public transportation
Reduces fuel emissions.

5.N6. a — Waterborne diseases such as diarrhea and hepatitis A
Contaminated water spreads infection.
