اللَّهُمَّ لا سَهْلَ إِلَّا ما جَعَلْتَهُ سَهْلًا، وأنتَ تَجْعَلُ الحَزْنَ إذا شِئْتَ سَهْلًا — صلِّ على النبي ﷺ

Part A · Past Exam Questions

أسئلة الدفعات السابقة

1 كويز 1 قضايا (ترم سابق)

Natural increase in the context of population growth occurs when:

a. Death rate is greater than the birth rate
b. Population decreases due to migration
c. Birth rate is greater than the death rate
d. Birth rate is equal to the death rate

2 كويز 1 قضايا (ترم سابق)

Emigration can affect the population through:

a. Decreasing the population size
b. Increasing the population size
c. Increasing the birth rate
d. No effect on population size

3 كويز 1 قضايا (ترم سابق)

Early marriage among females impacts population growth due to:

a. Increasing the birth rate by delaying reproduction
b. Shortening the reproductive period for women
c. Reducing the birth rate by delaying reproduction
d. Prolonging the reproductive period for women

4 كويز 1 قضايا (ترم سابق)

Early childbirth and having a large number of children are considered important for women in rural areas because it:

a. Improves living conditions
b. Ensures economic stability
c. Improves access to education
d. Protects against divorce

5 كويز 1 قضايا (ترم سابق)

Egypt's population is distributed between urban and rural areas as:

a. Urban 50%, rural 50%
b. Urban 39.7%, rural 60.3%
c. Urban 42.3%, rural 57.8%
d. Urban 49.7%, rural 50.3%

6 Egypt's population is primarily concentrated in: كويز 1 قضايا (ترم سابق)

a. Nile Valley and Delta
b. Along the Red Sea coast
c. Sinai Peninsula
d. Oases and Western Desert

7 What is Egypt's global rank in terms of population size? أسئلة سابقة

a. 10th
b. 20th
c. 16th
d. 5th

8 Which of the following countries has a larger population than Egypt in Africa? أسئلة سابقة

a. Kenya and tanzania
b. Nigeria and Ethiopia
c. South Africa and senegal
d. Sudan and tunisia

9 What are the three main factors that contribute to population growth? أسئلة سابقة

a. Births, deaths, and internal migration
b. Births, deaths, and external migration
c. Births, employment, and external migration
d. Deaths, health, and education

10 Which of the following is NOT a major component of population growth? أسئلة سابقة

a. Birth Rate
b. Death Rate
c. Immigration & Emigration
d. Literacy Rate

11 What is meant by "natural increase" in the context of population growth? أسئلة سابقة

a. When the birth rate is equal to the death rate
b. When the death rate is greater than the birth rate
c. When the birth rate is greater than the death rate
d. When the population decreases due to emigration

12 How is the population growth rate calculated? أسئلة سابقة

a. (Birth Rate + Immigration) - (Death Rate + Emigration)
b. (Birth Rate - Death Rate) + Immigration
c. (Death Rate + Emigration) - (Birth Rate + Immigration)
d. (Immigration - Emigration) / (Birth Rate + Death Rate)

13 What is immigration in the context of population growth? أسئلة سابقة

a. Leaving a country to settle elsewhere
b. Movement of individuals from one country to another, increasing the population
c. A decrease in the birth rate of a country
d. Migration out of a population to another region

14 How does emigration affect a population? أسئلة سابقة

a. It increases the population size
b. It decreases the population size
c. It has no effect on population size
d. It increases the birth rate

15 **Which of the following statements is true regarding population growth?** أسئلة سابقة

a. Only immigration affects the size of a population
b. Both immigration and emigration impact the size of a population
c. Emigration increases a country's population size
d. Immigration decreases a country's population size

16 **Which of the following is a reason for high birth rates in rural areas and populations with lower levels of education?** أسئلة سابقة

a. Higher cost of raising children
b. Increased economic and social value of children
c. Lower levels of poverty
d. Reduced need for large families

17 **How does early marriage among females impact population growth?** أسئلة سابقة

a. It reduces the birth rate by delaying reproduction
b. It shortens the reproductive period for women
c. It prolongs the reproductive period and limits women's education
d. It increases women's continuation in education

18 **In populations with lower education and higher poverty, what is one factor contributing to higher birth rates?** أسئلة سابقة

a. Increased access to education
b. Decrease in the cost of raising children
c. Higher cost of child care
d. Decrease in the value of having children

19 **Why are early childbirth and having a large number of children considered important for women in rural areas?** أسئلة سابقة

a. It ensures economic stability
b. protection against divorce
c. It reduces the cost of raising children
d. It improves access to education for women

20 **How does society's view of women contribute to rapid population growth, especially in rural areas?** أسئلة سابقة

a. Women are encouraged to focus on higher education
b. Women are fully integrated into the workforce
c. Female illiteracy and lower educational levels push women toward domestic life and childbearing
d. Women are given more leadership roles

21 **What is one reason for the preference for male offspring in rural areas?** أسئلة سابقة

a. Male children are believed to reduce poverty
b. Male children are seen as having higher cultural value
c. Male children are considered less expensive to raise
d. Male children improve a woman's education opportunities

22 What is a cultural pattern contributing to rapid population growth in rural areas? أسئلة سابقة

a. Women are encouraged to delay marriage and childbirth
b. The belief that having more children ensures the survival of family traditions
c. The cultural emphasis on education for women
d. The preference for smaller family sizes

23 What is one outcome of the continued cultural preference for male offspring? أسئلة سابقة

a. Parents may keep having children until they have a male child
b. Families prefer to stop having children after the firstborn
c. It encourages female education and workforce participation
d. It leads to a decrease in birth rates

24 Why do many rural residents view family planning with suspicion? أسئلة سابقة

a. Due to its high cost
b. Due to a lack of understanding of modern health practices
c. Due to misconceptions and religious concerns
d. Because of government policies

25 How does a lack of proper understanding of religion contribute to rapid population growth? أسئلة سابقة

a. It encourages larger family sizes through religious teachings
b. It leads to dissatisfaction with family planning methods
c. It promotes equal use of family planning among rural and urban populations
d. It decreases the desire for children in rural areas

26 Where is Egypt's population primarily concentrated? أسئلة سابقة

a. Along the Red Sea coast
b. In the Nile Valley and Delta
c. In the Sinai Peninsula
d. In the Western Desert

27 What percentage of Egypt's total area is inhabited? أسئلة سابقة

a. 50%
b. 25%
c. 7.8%
d. 60%

28 How is Egypt's population distributed between urban and rural areas? أسئلة سابقة

a. 70% urban, 30% rural
b. 42.3% urban, 57.8% rural
c. 60% urban, 40% rural
d. 50% urban, 50% rural

29 What is the population of Egypt as of September 2024, according to Worldometer's elaboration of UN data? أسئلة سابقة

a. 110 million
b. 116,940,726
c. 120 million
d. 113,500,000

30 Egypt’s population is equivalent to what percentage of the total world population? أسئلة سابقة

a. 2.5%
b. 1.43%
c. 3.1%
d. 0.9%

31 What is the population density of Egypt? أسئلة سابقة

a. 50 people per Km^2
b. 200 people per Km^2
c. 117 people per Km^2
d. 150 people per Km^2

32 What caused the expansion of the population pyramid base in Egypt? أسئلة سابقة

a. Decrease in fertility rates
b. Increase in the elderly population
c. Rapid increase in population size and high fertility rates until the mid-1980s
d. Decrease in birth rates since the 1980s

33 Why does the high percentage of children represent a burden on Egypt's economy? أسئلة سابقة

a. Children are part of the productive workforce
b. Children require resources for food, healthcare, and education
c. Children generate significant income for the country
d. Children contribute to reducing population growth

34 What percentage of females in the age group (12-64) participated in the labour force in 2018, according to CAPMAS? أسئلة سابقة

a. 25.5%
b. 40.2%
c. 18.3%
d. 30.1%

35 What is one key solution suggested for increasing female labour force participation in Egypt? أسئلة سابقة

a. Limiting women's education
b. Promoting male workforce participation
c. Improving job opportunities and promoting women’s empowerment
d. Reducing healthcare services for women

36 Why does low female labour force participation require attention in Egypt? أسئلة سابقة

a. It increases dependency on the male workforce
b. It limits economic growth and women's empowerment
c. It reduces the population growth rate
d. It increases competition in the job market

37 How does increasing women's participation in the workforce benefit society? أسئلة سابقة

a. It leads to fewer job opportunities for men
b. It changes the perception of women's roles being limited to childbearing
c. It increases early marriage and childbearing
d. It decreases women's access to education

38 What was the unemployment rate in Egypt in 2018 according to population censuses? أسئلة سابقة

a. 7.5%
b. 9.9%
c. 12.3%
d. 5.4%

39 **Why has the unemployment rate increased in recent years?** أسئلة سابقة

a. Because of a decrease in population growth
b. Due to the community's inability to create new jobs matching the number of people joining the labour market
c. Because of a reduction in education opportunities
d. Due to more people moving to rural areas

40 **What is a significant challenge caused by poor nutritional status among children in Egypt?** أسئلة سابقة

a. Increased job opportunities
b. Growing food gap due to the Increased food consumption and rising food prices due to population growth
c. Decreased child population
d. Better access to healthcare

41 **What did the Egypt Demographic and Health Survey (EDHS) in 2008 indicate about children's nutritional status?** أسئلة سابقة

a. Increased child obesity
b. Growth retardation due to lack of access to balanced food or chronic illness
c. Improved child nutrition across the country
d. Decreased rates of childhood illnesses

42 **What is an example of growth retardation mentioned in the EDHS survey?** أسئلة سابقة

a. Obesity
b. Short stature or dwarfism in children
c. Increased body mass index (BMI)
d. Faster growth rates in rural areas

43 **What percentage of Egypt's population was living in poverty in 2011?** أسئلة سابقة

a. 10%
b. 15%
c. 25%
d. 30%

44 **Where is the poverty rate higher in Egypt?** أسئلة سابقة

a. In urban areas compared to rural areas
b. In the Delta compared to Upper Egypt
c. In rural areas compared to urban areas
d. In coastal regions compared to inland areas

45 **Which area in Egypt experiences a higher poverty rate compared to others?** أسئلة سابقة

a. Delta
b. Upper Egypt
c. Coastal cities
d. Major urban centers

46 **What is a primary reason for the increase in slums in Egypt?** أسئلة سابقة

a. Population decline
b. Migration from cities to rural areas
c. Migration from the countryside to the city
d. Increase in industrial development in rural areas

47 Why are slum residents in Egypt living in inhumane conditions? أسئلة سابقة

a. They live in high-rise apartments
b. They lack basic facilities, suffer from poverty, and face unemployment
c. They have access to healthcare and education but no housing
d. They receive full government support for housing and jobs

48 What is one of the key challenges for the government in addressing slum growth? أسئلة سابقة

a. Overpopulation in rural areas
b. The inability to provide suitable housing and job opportunities for migrants
c. Too many job opportunities in the cities
d. High levels of education among slum residents

49 What is Egypt's stable water share that has led to water poverty due to population growth? أسئلة سابقة

a. 40 billion cubic meters
b. 55.5 billion cubic meters
c. 70 billion cubic meters
d. 100 billion cubic meters

50 What critical issue does Egypt face as a result of population growth and water poverty? أسئلة سابقة

a. A decrease in housing availability
b. Difficulty in achieving food and water security
c. An increase in industrial development
d. A rise in international trade

51 What is one consequence of the decreasing per capita share of agricultural land in Egypt? أسئلة سابقة

a. Increased crop yields
b. Decreased need for food security
c. Limited food security due to limited land and water
d. Expansion of rural agricultural areas

52 What percentage of its food needs does Egypt import due to water poverty and the food gap? أسئلة سابقة

a. 50%
b. 60%
c. 70%
d. 80%

53 Why has Egypt increasingly relied on food imports? أسئلة سابقة

a. Decrease in population growth
b. Limited water and agricultural land, leading to a food gap
c. Increased domestic food production
d. Expansion of agricultural land

54 What is one primary consequence of population growth on primary education? أسئلة سابقة

a. Decrease in the number of schools
b. Increased density of students in classrooms
c. Decrease in the number of children of school age
d. Increase in the education budget

55 Why has the density of students in classrooms increased despite limitations in the education budget? أسئلة سابقة

a. Increased number of teachers
b. Decrease in the number of births
c. Increase in the number of school-age children due to higher birth rates
d. Reduction in classroom sizes

56 What impact does an increase in population have on crime rates? أسئلة سابقة

a. It leads to a decrease in violent crimes
b. It results in new forms and types of violent crimes
c. It eliminates social and economic problems
d. It has no effect on crime rates

57 What happens to the reliance on external sources for energy as the population increases? أسئلة سابقة

a. It decreases significantly
b. It remains constant
c. It increases due to a wider gap in energy needs
d. It is eliminated entirely

58 What is one potential consequence of increasing reliance on the outside world for energy needs? أسئلة سابقة

a. Decrease in energy costs
b. Improvement in quality of life
c. Increase in the bill that could have been used for quality of life improvements
d. Reduction in population growth

59 What dual responsibility do humans have regarding the environment? أسئلة سابقة

a. Polluting the environment and reducing resource consumption
b. Polluting the environment and protecting the environment
c. Protecting the environment and increasing population growth
d. None of the above

Part B · NCLEX-Style Practice

أسئلة على طريقة NCLEX (إضافة)

N1 Population growth rate is calculated as: NCLEX

a. (Births + immigration) – (deaths + emigration)
b. Births – deaths only
c. Deaths + emigration
d. Immigration ÷ births

N2 Natural increase occurs when: NCLEX

a. Death rate > birth rate
b. Birth rate > death rate
c. Emigration > immigration
d. Births = deaths

N3 **Select ALL social factors behind high birth rates in rural Egypt.** SELECT ALL

a. Economic and social value of children
b. Early marriage of females
c. Belief that many children protect against divorce
d. High level of female education
e. Misconceptions about religion and family planning

N4 **Egypt's population is concentrated mainly in:** NCLEX

a. Western Desert oases
b. Nile Valley and Delta
c. Sinai
d. Red Sea coast

N5 **Early marriage increases population growth because it:** NCLEX

a. Shortens the reproductive period
b. Prolongs the reproductive period and limits women's education
c. Delays reproduction
d. Has no effect

N6 **Emigration affects the population by:** NCLEX

a. Increasing its size
b. Decreasing its size
c. Raising birth rate
d. No effect

Part C · Quizlet Flashcards

كروت مراجعة سريعة

غطّي العمود الأبيض بورقة واختبر نفسك: شوف المصطلح وقول التعريف.

Growth rate	(Births + immigration) − (deaths + emigration).	**Natural increase**	Birth rate > death rate.
Immigration	Entering a country → population ↑.	**Emigration**	Leaving a country → population ↓.
Egypt rank	~16th worldwide; larger in Africa: Nigeria, Ethiopia.	**Distribution**	Nile Valley & Delta; urban ≈42%, rural ≈58%.
Rural high fertility	Children's economic value, early marriage, fear of divorce.	**Early marriage**	Prolongs reproductive period, limits education.
Cost of children	Low cost in poor areas → more births.	**Religious misconceptions**	Some view family planning as forbidden.
Effects	Pressure on services, unemployment, housing, environment.	**Not a component**	Literacy rate.

Answer Key

الإجابات

1. c — Birth rate is greater than the death rate

2. a — Decreasing the population size

3. d — Prolonging the reproductive period for women

4. d — Protects against divorce

5. c — Urban 42.3%, rural 57.8%

6. a — Nile Valley and Delta

7. c — 16th

8. b — Nigeria and Ethiopia

9. b — Births, deaths, and external migration

10. d — Literacy Rate

11. c — When the birth rate is greater than the death rate

12. a — (Birth Rate + Immigration) - (Death Rate + Emigration)

13. b — Movement of individuals from one country to another, increasing the population

14. b — It decreases the population size

15. b — Both immigration and emigration impact the size of a population

16. b — Increased economic and social value of children

17. c — It prolongs the reproductive period and limits women's education

18. b — Decrease in the cost of raising children

19. b — protection against divorce

20. c — Female illiteracy and lower educational levels push women toward domestic life and childbearing

21. b — Male children are seen as having higher cultural value

22. b — The belief that having more children ensures the survival of family traditions

23. a — Parents may keep having children until they have a male child

24. c — Due to misconceptions and religious concerns

25. b — It leads to dissatisfaction with family planning methods

26. b — In the Nile Valley and Delta

27. c — 7.8%

28. b — 42.3% urban, 57.8% rural

29. b — 116,940,726

30. b — 1.43%

31. c — 117 people per Km^2

32. c — Rapid increase in population size and high fertility rates until the mid-1980s

33. b — Children require resources for food, healthcare, and education

34. c — 18.3%

35. c — Improving job opportunities and promoting women's empowerment

36. b — It limits economic growth and women's empowerment

37. b — It changes the perception of women's roles being limited to childbearing

38. b — 9.9%

39. b — Due to the community's inability to create new jobs matching the number of people joining the labour market

40. b — Growing food gap due to the Increased food consumption and rising food prices due to population growth

41. b — Growth retardation due to lack of access to balanced food or chronic illness

42. b — Short stature or dwarfism in children

43. c — 25%

44. c — In rural areas compared to urban areas

45. b — Upper Egypt

46. c — Migration from the countryside to the city

47. b — They lack basic facilities, suffer from poverty, and face unemployment

48. b — The inability to provide suitable housing and job opportunities for migrants

49. b — 55.5 billion cubic meters

50. b — Difficulty in achieving food and water security

51. c — Limited food security due to limited land and water

52. d — 80%

53. b — Limited water and agricultural land, leading to a food gap

54. b — Increased density of students in classrooms

55. c — Increase in the number of school-age children due to higher birth rates

56. b — It results in new forms and types of violent crimes

57. c — It increases due to a wider gap in energy needs

58. c — Increase in the bill that could have been used for quality of life improvements

59. b — Polluting the environment and protecting the environment

N1. a — (Births + immigration) − (deaths + emigration)
The three components are births, deaths and migration.

N2. b — Birth rate > death rate
Natural increase = births minus deaths, ignoring migration.

N3. a, b, c, e — Economic and social value of children; Early marriage of females; Belief that many children protect against divorce; Misconceptions about religion and family planning
Education of women lowers fertility.

N4. b — Nile Valley and Delta
Most Egyptians live on a small fraction of land along the Nile.

N5. b — Prolongs the reproductive period and limits women's education
Longer exposure to pregnancy plus less education.

N6. b — Decreasing its size
Emigrants leave the country.
