جنب كل سؤال مصدره. لو السؤال اتكرر في كذا امتحان مكتوب كل مرة بمصدرها، وعليه علامة "تكرر". الإجابات كلها في آخر الملف.

اللَّهُمَّ لا سَهْلَ إِلَّا ما جَعَلْتَهُ سَهْلًا، وأنتَ تَجْعَلُ الحَزْنَ إذا شِئْتَ سَهْلًا — صلِّ على النبي ﷺ

Part A · Past Exam Questions

أسئلة الدفعات السابقة

1 كويز 1 قضايا (ترم سابق)

Long-acting contraceptive methods include:

a. Skin patch
b. Vaginal ring
c. Oral contraceptive pills
d. Copper intrauterine device

2 كويز 1 قضايا (ترم سابق)

Key benefits of spacing pregnancies at least two years apart include:

a. Reducing the need for medical care
b. Improving maternal and child health outcomes
c. Decreasing birth weight
d. Increasing the risk of complications

3 كويز 1 قضايا (ترم سابق)

The objective of reproductive health programs is to:

a. Ensure safe motherhood and childbirth
b. Increase the global birth rate
c. Promote population control policies
d. Reduce access to family planning services

4 كويز 1 قضايا (ترم سابق)

The permanent method of contraception is:

a. Birth control patch
b. Subdermal implants
c. Tubal ligation
d. Injectable contraceptive

5 كويز 1 قضايا (ترم سابق)

Which of the following is a key aspect of reproductive health?

a. Providing access to contraceptives only
b. Ensuring individuals can have a satisfying and safe sex life
c. Reducing the global population
d. Preventing pregnancy only

6 What does reproductive health ensure? أسئلة سابقة

a. A satisfying and safe sexual life
b. Early pregnancy for all women
c. Childbirth at a young age
d. The elimination of family planning

7 Reproductive health includes: أسئلة سابقة

a. Physical and mental health only
b. Only physical health habits
c. Personal health, mental safety, and sexual activity
d. Only family planning decisions

8 Why is it important to provide reproductive health education to young people? أسئلة سابقة

a. To prepare them for pregnancy early
b. To inform them about safe, effective family planning
c. To avoid sexual health discussions
d. To encourage only childbearing women

9 Reproductive health affects: أسئلة سابقة

a. Only childbearing women
b. Men and women of all ages
c. Prenatal stages only
d. Only people in adolescence

10 What does reproductive health focus on, according to the International Conference on Population and Development? أسئلة سابقة

a. The prevention of reproductive diseases
b. Physical, mental, and social well-being related to the reproductive system
c. Avoiding diseases or disability
d. Childbearing age only

11 What is needed to achieve better reproductive health? أسئلة سابقة

a. Focus only on women's decisions
b. Involvement of both men and women in family decisions
c. Limiting decisions to married couples
d. Focus only on adolescent health

12 Reproductive health includes care for: أسئلة سابقة

a. Only childbearing women
b. Only prenatal stages
c. People at all life stages
d. Only early childhood stages

13 Family planning should be: أسئلة سابقة

a. Expensive and complex
b. Affordable and acceptable
c. Focused on men only
d. Provided for childbearing women only

14 What is one of the target categories of reproductive health services? أسئلة سابقة

a. Adolescents and youth to avoid harmful behaviors
b. Only men to improve their health
c. Children before adolescence
d. Only women of childbearing age

15 Reproductive health services include: أسئلة سابقة

a. Limited access to family planning
b. Providing high-quality family planning and infertility services
c. Preventing all types of pregnancy
d. Avoiding healthcare during childbirth

16 Which group is provided care to prevent reproductive system diseases? أسئلة سابقة

a. Adolescents and youth
b. Postnatal children
c. Women after childbearing age
d. Only men

17 What does reproductive health aim to eliminate? أسئلة سابقة

a. The need for family planning
b. Unsafe abortions
c. Childbirth in hospitals
d. All reproductive health services

18 Regular check-ups and examinations are provided for: أسئلة سابقة

a. Children and in premarital examinations
b. Only married women
c. Men only
d. Women after menopause

19 What service is part of the reproductive health services package for women? أسئلة سابقة

a. Only child health care
b. Postpartum and post-abortion care
c. Premarital examinations only
d. Only care for tumors

20 What service is included for couples (men and women)? أسئلة سابقة

a. Only child health
b. Comprehensive family planning
c. Services unrelated to sexual health
d. Postnatal care only

21 Prevention and treatment of sexually transmitted infections are provided for: أسئلة سابقة

a. Couples only
b. Only children
c. Both men and women
d. Only adolescents

22 What is one key message of reproductive health? أسئلة سابقة

a. Pre-marital care
b. Having many children early
c. Avoiding family planning
d. Limiting women's education

23 What is the aim of pre-marital care? أسئلة سابقة

a. Provide health education and interventions for those intending to marry
b. Avoid discussions about family planning
c. Promote early pregnancy without planning
d. Limit medical exams before marriage

24 Delaying the birth of the first child helps: أسئلة سابقة

a. Avoid responsibilities in marriage
b. Strengthen the couple's relationship and enhance stability
c. Prevent couples from adapting to married life
d. Focus only on work and avoid children

25 What does pre-marital care help couples plan for? أسئلة سابقة

a. A healthy pregnancy and childbirth
b. Immediate responsibilities and work
c. Avoiding all medical exams
d. Only the woman's health

26 Why is delaying the first child important for couples? أسئلة سابقة

a. To focus on early pregnancy
b. To adapt to new life and responsibilities
c. To avoid family planning
d. To have children immediately after marriage

27 What does pre-marital care provide to prevent transmission of infections? أسئلة سابقة

a. Only medical history
b. Counselling for infection prevention between spouses
c. Avoidance of health education
d. Only social interventions

28 What tests are conducted during pre-marital care? أسئلة سابقة

a. Only social assessments
b. Medical history and necessary tests
c. Physical fitness only
d. Mental health screenings only

29 What is one role of men in family planning? أسئلة سابقة

a. Avoid discussions about reproductive health
b. Participate in family planning decisions
c. Focus only on delaying pregnancy
d. Exclude women from decisions

30 What is one role of men in family planning? أسئلة سابقة

a. Adopt the concept of a small family
b. Only focus on their own health
c. Avoid discussions about family planning
d. Ignore reproductive health decisions

31 How should men participate in family planning? أسئلة سابقة

a. Make decisions alone
b. Encourage the wife to make family planning decisions
c. Ignore decisions about pregnancy
d. Limit discussions to economic matters

32 Why is pregnancy spacing important for mothers? أسئلة سابقة

a. It helps them physically and emotionally recover before the next pregnancy
b. It makes pregnancy occur more frequently
c. It focuses on the father's health
d. It delays caring for the new child

33 What impact does pregnancy spacing have on children? أسئلة سابقة

a. It improves their school performance
b. It reduces the time parents can spend with them
c. It delays their development
d. It weakens their health

34 Men's involvement in family planning helps: أسئلة سابقة

a. Change reproductive behavior and attitudes towards family planning
b. Limit discussions on economic problems
c. Focus only on women's health
d. Avoid decisions about childbirth

35 How does pregnancy spacing benefit parents? أسئلة سابقة

a. It gives them more time to care for their child and maintain relationships
b. It shortens the time parents spend with their children
c. It focuses only on financial benefits
d. It limits their involvement in childcare

36 What awareness should men have about the population problem? أسئلة سابقة

a. Its impact on the family and society's economic situation
b. That it does not affect their family
c. That it is only the wife's responsibility
d. That it only affects individual health

37 Pregnancy spacing helps reduce: أسئلة سابقة

a. The need for childcare
b. The incidence of abortion and unintended pregnancy
c. The health of the family
d. The role of men in family planning

38 What is child marriage? أسئلة سابقة

a. A union where one or both parties are under 18 years old
b. A union between people over 18 years old
c. A marriage with complete freedom of consent
d. A marriage where both parties are well-educated

39 Why is early marriage considered a form of forced marriage? أسئلة سابقة

a. Because it is always voluntary
b. Because one or both parties lack full freedom of consent
c. Because both parties are mature enough
d. Because the marriage is planned by the state

40 What is one social consequence of early marriage? أسئلة سابقة

a. Increase in education levels
b. Spread of domestic violence
c. Improvement in family relationships
d. Strengthening of the economy

41 Early marriage can lead to: أسئلة سابقة

a. Decline in education levels and spread of poverty
b. Better understanding of family dynamics
c. Fewer social problems
d. More economic opportunities for young people

42 What health issues are young mothers more likely to face? أسئلة سابقة

a. Anaemia and high blood pressure
b. Fewer complications during pregnancy
c. Lower risk of infections
d. Stronger emotional stability

43 Teenage mothers are more likely to experience: أسئلة سابقة

a. Postpartum depression compared to older mothers
b. Fewer mood swings and anxiety
c. No difficulties in concentrating or sleeping
d. Better mental health after childbirth

44 What is a potential consequence of early marriage on mental health? أسئلة سابقة

a. Difficulty concentrating, eating, and sleeping for one to two weeks
b. Improved focus and emotional well-being
c. Stronger relationships with family
d. No impact on mental health

45 What age group of mothers faces a higher likelihood of pregnancy-related complications? أسئلة سابقة

a. Mothers aged 10 to 19
b. Mothers over the age of 30
c. Mothers aged 20 to 25
d. All age groups equally

46 How does female education impact society? أسئلة سابقة

a. It contributes to the overall improvement of society
b. It limits women's role in family management
c. It only affects the individual's career
d. It has no effect on children's behavior

47 What is one benefit of educating women? أسئلة سابقة

a. It completely changes their perception and attitudes
b. It reduces their involvement in society
c. It limits their ability to manage families
d. It focuses only on career growth

48 Why should marriages between close relatives be limited? أسئلة سابقة

a. To avoid genetic diseases
b. To improve economic stability
c. To strengthen family ties
d. To promote cultural traditions

49 What did a study in Egypt find about the rate of congenital defects in newborns? أسئلة سابقة

a. 2-3% of all newborns had congenital defects
b. 10% of newborns had defects
c. No defects were found
d. 15% of newborns were free from defects

50 What percentage of child deaths in Egypt in 2008 were due to congenital defects at birth? أسئلة سابقة

a. 15%
b. 25%
c. 5%
d. 30%

51 What genetic issues were most common among children in the 2012 Egyptian study? أسئلة سابقة

a. Neurological diseases and defects in red blood cells
b. Only mental health issues
c. No genetic defects were reported
d. Respiratory problems

52 In families where first-degree kinship marriages occur, the incidence of genetic diseases can reach: أسئلة سابقة

a. 4% to 6%
b. Less than 1%
c. Only 2%
d. 10% or more

53 How do genetic diseases affect child mortality rates? أسئلة سابقة

a. They contribute to a significant portion of child and infant deaths
b. They have no impact on child deaths
c. They only affect elderly populations
d. They are not linked to any fatalities

أسئلة سابقة

54 What is family planning?

a. A conscious and organized effort to regulate fertility
b. An automatic process with no planning
c. A government-imposed policy on childbirth
d. A service only available to married couples

أسئلة سابقة

55 What is one importance of family planning?

a. Ability to determine the number of children and space pregnancies
b. To force couples to have children
c. To eliminate all pregnancies
d. To reduce the need for education

أسئلة سابقة

56 Family planning helps protect against:

a. Unintended pregnancy
b. All health issues
c. Early marriage
d. None of the above

أسئلة سابقة

57 How does family planning benefit women?

a. It provides better opportunities for education or work
b. It limits their career choices
c. It prevents them from managing their families
d. It has no impact on their opportunities

أسئلة سابقة

58 How does family planning save mothers' lives?

a. By reducing the number of births and spacing pregnancies
b. By encouraging early pregnancies
c. By promoting larger families
d. By restricting access to healthcare

أسئلة سابقة

59 What does "unmet family planning needs" refer to?

a. Women wanting to avoid pregnancy but not using family planning methods
b. Women not wishing to have children
c. Couples planning many pregnancies
d. A lack of children in families

أسئلة سابقة

60 How many women in developing countries wish to avoid pregnancy but do not use family planning?

a. More than 100 million
b. Less than 10 million
c. About 50 million
d. None

أسئلة سابقة

61 What factors can contribute to unmet family planning needs?

a. Various reasons, including lack of access to methods
b. Overabundance of family planning options
c. A strong desire for larger families
d. Limited healthcare access for men only

62 How does the World Health Organization (WHO) define maternal health? أسئلة سابقة

a. Women's safety during pregnancy, childbirth, and postpartum
b. Women's health at all ages
c. Only the health of the newborn
d. Health services available to men

63 What percentage of maternal deaths in developing countries is due to early or late pregnancy? أسئلة سابقة

a. Approximately 99%
b. About 50%
c. Less than 25%
d. Nearly 75%

64 What is the recommended age to wait before attempting pregnancy for the health of both mother and child? أسئلة سابقة

a. At least eighteen years old
b. At least sixteen years old
c. At least twenty-one years old
d. Any age is acceptable

65 How long should a woman wait after giving birth before attempting another pregnancy? أسئلة سابقة

a. At least two years
b. At least six months
c. At least one year
d. No waiting period is necessary

66 What increases the risks associated with childbirth as a woman ages? أسئلة سابقة

a. Increased likelihood of having children with autism or Down Syndrome
b. Fewer complications during childbirth
c. Reduced need for medical intervention
d. Higher fertility rates

67 What are some advantages of pregnancy spacing? أسئلة سابقة

a. Reducing infant and maternal mortality rates
b. Increasing birth rates
c. Raising the risk of health complications
d. None of the above

68 Why is family planning considered a cost-effective health intervention? أسئلة سابقة

a. It helps avoid costs associated with government services
b. It requires high levels of government funding
c. It focuses solely on increasing population
d. It does not require any resources

69 What are the potential global impacts of eliminating unmet contraceptive needs? أسئلة سابقة

a. Reduction of 640,000 neonatal deaths and 150,000 maternal deaths
b. Increase in maternal and neonatal deaths
c. No change in global health outcomes
d. Higher healthcare costs

70 What role do expenditures on population activities play in a country's progress? أسئلة سابقة

a. They are crucial indicators of implementing the ICPD action plan and achieving Sustainable Development Goals
b. They only impact economic growth
c. They are unrelated to health services
d. They only benefit certain age groups

71 How is access to family planning recognized globally? أسئلة سابقة

a. As a human right
b. As a privilege for the wealthy
c. As a cultural issue
d. As an optional service

72 What key document affirmed family planning as a human right? أسئلة سابقة

a. The International Conference on Population and Development (ICPD) in 1994
b. The Universal Declaration of Human Rights
c. The Cairo Declaration on Human Rights
d. The Sustainable Development Goals

73 What is the purpose of Egypt's National Strategy for Human Rights? أسئلة سابقة

a. To enhance social, economic, political, and cultural rights
b. To limit access to family planning services
c. To reduce governmental responsibilities
d. To focus solely on economic growth

74 What are short-acting hormonal methods of family planning? أسئلة سابقة

a. Methods that must be used daily, weekly, or monthly
b. Permanent methods of birth control
c. Methods that last for several years
d. Natural methods based on fertility awareness

75 What is an example of a long-acting hormonal method? أسئلة سابقة

a. The copper IUD
b. Oral contraceptives
c. The morning-after pill
d. Fertility awareness methods

76 What does sterilization refer to in family planning? أسئلة سابقة

a. A permanent method of birth control
b. A temporary method
c. An emergency contraceptive
d. A natural method

77 What do fertility awareness methods focus on? أسئلة سابقة

a. Knowing the days when pregnancy can occur
b. Using hormonal contraceptives
c. Emergency contraception
d. Sterilization techniques

78 What is an example of emergency contraception? أسئلة سابقة

a. The morning-after pill
b. Copper IUD
c. Tubal ligation
d. Fertility awareness methods

79 How do birth control methods primarily work? أسئلة سابقة

a. By preventing sperm from reaching the egg
b. By increasing fertility
c. By enhancing the chances of conception
d. By eliminating menstrual cycles

80 What is one way that birth control methods can prevent pregnancy? أسئلة سابقة

a. By changing the lining of the uterus
b. By promoting ovulation
c. By decreasing sperm production
d. By increasing the release of eggs

81 What must be done for any birth control method to be effective? أسئلة سابقة

a. It must be used consistently and correctly
b. It must be used only during ovulation
c. It must be administered by a partner
d. It must be changed frequently

82 Which methods require little effort from the user? أسئلة سابقة

a. IUDs and sterilization
b. Condoms and fertility awareness methods
c. Oral contraceptives
d. Natural family planning

83 What additional benefits can some birth control methods provide? أسئلة سابقة

a. Reducing blood flow during menstruation
b. Increasing the risk of infections
c. Making periods longer
d. Enhancing fertility

84 What factors can affect a woman's choice of birth control method over her lifetime? أسئلة سابقة

a. Age, health history, and number of desired children
b. Only her partner's preferences
c. The season of the year
d. The method's availability in her area

85 Why might the best method of birth control change for a woman? أسئلة سابقة

a. Because it is affected by various personal factors
b. Because all methods have the same effectiveness
c. Because new methods are developed frequently
d. Because social trends dictate preferences

86 How do some methods thicken cervical mucus? أسئلة سابقة

a. To make it difficult for sperm to pass through
b. To facilitate sperm movement
c. To prevent ovulation
d. To enhance egg quality

Part B · NCLEX-Style Practice

أسئلة على طريقة NCLEX (إضافة)

N1 The objective of reproductive health programs is to: NCLEX

a. Increase birth rate
b. Ensure safe motherhood and childbirth
c. Restrict family planning
d. Control population by force

N2 Which is a permanent contraceptive method? NCLEX

a. IUD
b. Implant
c. Tubal ligation
d. Pills

N3 Select ALL long-acting reversible contraceptives. SELECT ALL

a. Copper IUD
b. Subdermal implant
c. Hormonal IUD
d. Condom
e. Oral pills

N4 Spacing pregnancies at least two years apart mainly: NCLEX

a. Decreases birth weight
b. Improves maternal and child health
c. Increases complications
d. Has no benefit

N5 Family planning services should be: NCLEX

a. Expensive
b. Affordable and acceptable
c. For men only
d. Restricted

N6 Reproductive health means people can: NCLEX

a. Use contraceptives only
b. Have a satisfying and safe sex life and decide if/when to reproduce
c. Reduce the global population
d. Avoid pregnancy only

Part C · Quizlet Flashcards

كروت مراجعة سريعة

غطّي العمود الأبيض بورقة واختبر نفسك: شوف المصطلح وقول التعريف.

Reproductive health	Safe, satisfying sex life; capability to reproduce; freedom to decide.	**Program objective**	Safe motherhood and childbirth.
Family planning	Affordable, acceptable, accessible.	**Spacing**	≥2 years improves maternal & child health.

Permanent methods	Tubal ligation, vasectomy.
Short-acting	Pills, injectables, patch, ring, condoms.
Barriers	Misconceptions, low education, rural norms.
Unmet need	Women wanting to avoid pregnancy without using contraception.

LARC	IUD, implants.
Copper IUD	Long-acting non-hormonal.
Benefits	Lower maternal/infant mortality, better family economy.
Counseling	Informed choice of method.

Answer Key

الإجابات

1. d — Copper intrauterine device

2. b — Improving maternal and child health outcomes

3. a — Ensure safe motherhood and childbirth

4. c — Tubal ligation

5. b — Ensuring individuals can have a satisfying and safe sex life

6. a — A satisfying and safe sexual life

7. c — Personal health, mental safety, and sexual activity

8. b — To inform them about safe, effective family planning

9. b — Men and women of all ages

10. b — Physical, mental, and social well-being related to the reproductive system

11. b — Involvement of both men and women in family decisions

12. c — People at all life stages

13. b — Affordable and acceptable

14. a — Adolescents and youth to avoid harmful behaviors

15. b — Providing high-quality family planning and infertility services

16. c — Women after childbearing age

17. b — Unsafe abortions

18. a — Children and in premarital examinations

19. b — Postpartum and post-abortion care

20. b — Comprehensive family planning

21. c — Both men and women

22. a — Pre-marital care

23. a — Provide health education and interventions for those intending to marry

24. b — Strengthen the couple's relationship and enhance stability

25. a — A healthy pregnancy and childbirth

26. b — To adapt to new life and responsibilities

27. b — Counselling for infection prevention between spouses

28. b — Medical history and necessary tests

29. b — Participate in family planning decisions

30. a — Adopt the concept of a small family

31. b — Encourage the wife to make family planning decisions

32. a — It helps them physically and emotionally recover before the next pregnancy

33. a — It improves their school performance

34. a — Change reproductive behavior and attitudes towards family planning

35. a — It gives them more time to care for their child and maintain relationships

36. a — Its impact on the family and society's economic situation

37. b — The incidence of abortion and unintended pregnancy

38. a — A union where one or both parties are under 18 years old

39. b — Because one or both parties lack full freedom of consent

40. b — Spread of domestic violence

41. a — Decline in education levels and spread of poverty

42. a — Anaemia and high blood pressure

43. a — Postpartum depression compared to older mothers

44. a — Difficulty concentrating, eating, and sleeping for one to two weeks

45. a — Mothers aged 10 to 19

46. a — It contributes to the overall improvement of society

47. a — It completely changes their perception and attitudes

48. a — To avoid genetic diseases

49. a — 2-3% of all newborns had congenital defects

50. a — 15%

51. a — Neurological diseases and defects in red blood cells

52. a — 4% to 6%

53. a — They contribute to a significant portion of child and infant deaths

54. a — A conscious and organized effort to regulate fertility

55. a — Ability to determine the number of children and space pregnancies

56. a — Unintended pregnancy

57. a — It provides better opportunities for education or work

58. a — By reducing the number of births and spacing pregnancies

59. a — Women wanting to avoid pregnancy but not using family planning methods

60. a — More than 100 million

61. a — Various reasons, including lack of access to methods

62. a — Women's safety during pregnancy, childbirth, and postpartum

63. a — Approximately 99%

64. a — At least eighteen years old

65. a — At least two years

66. a — Increased likelihood of having children with autism or Down Syndrome

67. a — Reducing infant and maternal mortality rates

68. a — It helps avoid costs associated with government services

69. a — Reduction of 640,000 neonatal deaths and 150,000 maternal deaths

70. a — They are crucial indicators of implementing the ICPD action plan and achieving Sustainable Development Goals

71. a — As a human right

72. a — The International Conference on Population and Development (ICPD) in 1994

73. a — To enhance social, economic, political, and cultural rights

74. a — Methods that must be used daily, weekly, or monthly

75. a — The copper IUD

76. a — A permanent method of birth control

77. a — Knowing the days when pregnancy can occur

78. a — The morning-after pill

79. a — By preventing sperm from reaching the egg

80. a — By changing the lining of the uterus

81. a — It must be used consistently and correctly

82. a — IUDs and sterilization

83. a — Reducing blood flow during menstruation

84. a — Age, health history, and number of desired children

85. a — Because it is affected by various personal factors

86. a — To make it difficult for sperm to pass through

N1. b — Ensure safe motherhood and childbirth
Reproductive health includes safe pregnancy, childbirth and a safe sex life.

N2. c — Tubal ligation
Tubal ligation and vasectomy are permanent.

N3. a, b, c — Copper IUD; Subdermal implant; Hormonal IUD
Pills and condoms are short-acting.

N4. b — Improves maternal and child health
Adequate spacing lowers maternal and infant morbidity and mortality.

N5. b — Affordable and acceptable
Accessibility and acceptability increase use.

N6. b — Have a satisfying and safe sex life and decide if/when to reproduce
WHO definition of reproductive health.
