Past exam questions	NCLEX-style	Flashcards

المصادر اللي اتجمعت منها أسئلة المحاضرة دي:

أسئلة سابقة · كويز 2 قضايا

جنب كل سؤال مصدره. لو السؤال اتكرر في كذا امتحان مكتوب كل مرة بمصدرها، وعليه علامة "تكرر". الإجابات كلها في آخر الملف.

اللَّهُمَّ لا سَهْلَ إِلَّا ما جَعَلْتَهُ سَهْلًا، وأنتَ تَجْعَلُ الحَزْنَ إذا شِئْتَ سَهْلًا — صلِّ على النبي ﷺ

Part A · Past Exam Questions

أسئلة الدفعات السابقة

1 The largest contributor to air pollution is: — كويز 2 قضايا

a. Forest fires
b. Chemical plants
c. Fuel combustion
d. Dust storms

2 One of the harmful effects of increased toxic gases in the environment is: — كويز 2 قضايا

a. Respiratory diseases
b. Improved air quality
c. Increased plant growth
d. Decreased soil fertility

3 The quantity and quality of pollutants that exceed the critical ecological threshold is: — كويز 2 قضايا

a. Hazardous pollution
b. Destructive pollution
c. Normal pollution
d. Acceptable pollution

4 The most widespread form of environmental pollution is: — كويز 2 قضايا

a. Soil
b. Radioactive
c. Air
d. Water

5 The percentage of African diseases resulting from environmental pollution is: — كويز 2 قضايا

a. 28%
b. 20%
c. 27%
d. 25%

6 What is the primary objective of learning about environmental pollution? — أسئلة سابقة

a. To understand its causes and impacts on the planet
b. To reduce all human activity globally
c. To increase pollution levels in urban areas
d. To build more industries

7 How does pollution primarily affect the ecosystem? أسئلة سابقة

a. It improves biodiversity
b. It disturbs the balance and stability
c. It promotes plant growth
d. It supports wildlife conservation

8 Which of the following activities directly leads to pollution? أسئلة سابقة

a. Use of renewable energy
b. Proper waste disposal
c. Industrial emissions
d. Planting trees

9 What is the main link between pollution and human activities? أسئلة سابقة

a. Pollution only comes from nature
b. Human activities generate pollutants
c. Human actions cannot affect the environment
d. Pollution is unrelated to human actions

10 What does “harmless pollution” mean in the text? أسئلة سابقة

a. Pollution that has no major impact
b. Pollution caused by humans and animals
c. Pollution that affects future generations
d. Pollution that completely destroys ecosystems

11 Which environmental factor is most affected by pollution? أسئلة سابقة

a. Language and culture
b. Air, water, and soil
c. Economic growth
d. Communication systems

12 What type of pollution results in harm to ecosystems over a short period? أسئلة سابقة

a. Harmless pollution
b. Airborne pollution
c. Destructive pollution
d. Soil erosion

13 According to the text, what is one way to protect the environment? أسئلة سابقة

a. Promoting awareness and recycling waste
b. Encouraging rapid industrialization
c. Increasing deforestation
d. Limiting scientific research

14 What major disaster is an example of destructive pollution? أسئلة سابقة

a. The Industrial Revolution
b. The Chernobyl incident
c. The Green Revolution
d. Natural disasters like hurricanes

15 What is a key takeaway about the relationship between pollution and human health? أسئلة سابقة

a. Pollution has no direct impact on health
b. Pollution is primarily beneficial to health
c. Pollution increases diseases and risks to well-being
d. Pollution leads to economic growth only

16 What is the main cause of air pollution? أسئلة سابقة

a. Industrial emissions and vehicle exhaust
b. Excessive tree planting
c. Increased oxygen production
d. Reduced fossil fuel use

17 Which of the following is a major consequence of air pollution? أسئلة سابقة

a. Improved air quality
b. Increased respiratory diseases
c. Higher crop yield
d. Stabilized climate patterns

18 What is a major source of water pollution? أسئلة سابقة

a. Use of clean energy sources
b. Untreated sewage and industrial waste
c. Recycling of wastewater
d. Agricultural water management

19 How does water pollution primarily affect humans and animals? أسئلة سابقة

a. By promoting clean drinking water
b. By increasing disease risks
c. By improving aquatic ecosystems
d. By reducing marine biodiversity

20 Which human activity contributes most to soil pollution? 1 أسئلة سابقة

a. Excessive use of fertilizers and pesticides
b. Organic farming practices
c. Planting cover crops
d. Natural soil enrichment

21 What is one consequence of soil pollution on agriculture? أسئلة سابقة

a. Increased soil fertility
b. Higher crop productivity
c. Contamination of food crops
d. Enhanced soil preservation

22 Which of the following pollutants is associated with industrial air emissions? أسئلة سابقة

a. Oxygen
b. Nitrogen oxides and sulfur dioxide
c. Clean water vapor
d. Carbon-free compounds

23 What happens when untreated wastewater enters water bodies? أسئلة سابقة

a. It enhances aquatic life
b. It purifies the water naturally
c. It causes contamination and diseases
d. It increases oxygen content in water

24 Why is soil erosion considered a serious issue? أسئلة سابقة

a. It reduces water pollution
b. It improves the soil's nutrients
c. It removes the top fertile layer of soil
d. It encourages plant growth

25 How does air pollution affect the environment? أسئلة سابقة

a. It helps regulate the climate
b. It causes acid rain and smog formation
c. It improves the water cycle
d. It increases green vegetation

26 What is the main cause of radioactive pollution? أسئلة سابقة

a. Industrial emissions
b. Excessive use of pesticides
c. Nuclear tests and radioactive waste
d. Sewage water discharge

27 What is one major health impact of radiation pollution? أسئلة سابقة

a. Improved immune systems
b. Cell damage and cancer risks
c. Enhanced lung capacity
d. Reduced risk of diseases

28 How does radiation pollution affect water bodies? أسئلة سابقة

a. It purifies water naturally
b. It contaminates water and harms marine life
c. It increases aquatic oxygen levels
d. It enhances fish reproduction

29 What type of pollution occurs due to radioactive emissions? أسئلة سابقة

a. Air pollution only
b. Soil, air, and water pollution
c. Noise pollution
d. Light pollution

30 What are common sources of radioactive pollution? أسئلة سابقة

a. Household waste and vehicle emissions
b. Nuclear energy plants and radioactive medical waste
c. Use of organic fertilizers
d. Wind energy production

31 What is the impact of radioactive pollution on plants? أسئلة سابقة

a. Increased plant growth
b. Enhanced photosynthesis
c. Genetic mutations and plant death
d. Enrichment of soil nutrients

32 Which of the following can help reduce pollution? أسئلة سابقة

a. Encouraging waste recycling
b. Increasing industrial emissions
c. Reducing the use of clean energy
d. Cutting down forests for land

33 What is a key method to control pollution as shown in the text? أسئلة سابقة

a. Use of renewable energy and planting trees
b. Increasing chemical usage in agriculture
c. Promoting urbanization without limits
d. Burning fossil fuels excessively

34 How does radioactive pollution impact human blood? أسئلة سابقة

a. It increases oxygen levels
b. It causes blood disorders and reduces immunity
c. It strengthens blood cells
d. It has no effect on the blood

35 What is a major way to save the environment from pollution? أسئلة سابقة

a. Limiting waste generation and promoting recycling
b. Using more fossil fuels
c. Increasing nuclear testing
d. Promoting plastic usage

Part B · NCLEX-Style Practice

أسئلة على طريقة NCLEX (إضافة)

N1 The most widespread form of environmental pollution is: NCLEX

a. Soil
b. Air
c. Noise
d. Radioactive

N2 The largest contributor to air pollution is: NCLEX

a. Dust storms
b. Fuel combustion
c. Volcanoes
d. Forest fires

N3 Select ALL health effects of air pollution. SELECT ALL

a. Respiratory diseases
b. Cardiovascular diseases
c. Eye irritation
d. Lung cancer
e. Improved immunity

N4 Pollution that exceeds the critical ecological threshold is called: NCLEX

a. Acceptable
b. Normal
c. Hazardous
d. Harmless

N5 Which individual action reduces pollution? NCLEX

a. Burning waste
b. Using public transportation
c. Using plastic bags frequently
d. Wasting electricity

N6 Water pollution most commonly causes: NCLEX

a. Waterborne diseases such as diarrhea and hepatitis A
b. Asthma only
c. Skin tanning
d. Hearing loss

Part C · Quizlet Flashcards

كروت مراجعة سريعة

غطّي العمود الأبيض بورقة واختبر نفسك: شوف المصطلح وقول التعريف.

Pollution	Any change in environment harmful to living organisms.
Most widespread	Air pollution.
Levels	Acceptable/harmless, hazardous, destructive.
Types	Air, water, soil, noise, radioactive, food.
Africa	~28% of diseases from environmental pollution.
Prevention	Waste management, renewable energy, public transport, recycling.

Main source	Human activities (industry, transport).
Largest air contributor	Fuel combustion.
Hazardous	Exceeds critical ecological threshold.
Health effects	Respiratory, cardiovascular, cancers, waterborne disease.
Ecosystem effect	Disturbs balance and stability.
Nurse role	Health education, advocacy, screening.

Answer Key

الإجابات

1. c — Fuel combustion

2. a — Respiratory diseases

3. a — Hazardous pollution
إجابات كويز 2 من اختيارات الطالب في الصورة. أسئلة التغير المناخي في الكويز اتشالت (مش في منهج الميدترم).

4. c — Air

5. a — 28%

6. a — To understand its causes and impacts on the planet

7. b — It disturbs the balance and stability

8. c — Industrial emissions

9. b — Human activities generate pollutants

10. a — Pollution that has no major impact

11. b — Air, water, and soil

12. c — Destructive pollution

13. a — Promoting awareness and recycling waste

14. b — The Chernobyl incident

15. c — Pollution increases diseases and risks to well-being

16. a — Industrial emissions and vehicle exhaust

17. b — Increased respiratory diseases

18. b — Untreated sewage and industrial waste

19. b — By increasing disease risks

20. a — Excessive use of fertilizers and pesticides

21. c — Contamination of food crops

22. b — Nitrogen oxides and sulfur dioxide

23. c — It causes contamination and diseases

24. c — It removes the top fertile layer of soil

25. b — It causes acid rain and smog formation

26. c — Nuclear tests and radioactive waste

27. b — Cell damage and cancer risks

28. b — It contaminates water and harms marine life

29. b — Soil, air, and water pollution

30. b — Nuclear energy plants and radioactive medical waste

31. c — Genetic mutations and plant death

32. a — Encouraging waste recycling

33. a — Use of renewable energy and planting trees

34. b — It causes blood disorders and reduces immunity

35. a — Limiting waste generation and promoting recycling

N1. b — Air
Air pollution affects the largest number of people.

N2. b — Fuel combustion
Burning fossil fuels in vehicles, industry and power plants.

N3. a, b, c, d — Respiratory diseases; Cardiovascular diseases; Eye irritation; Lung cancer
Pollution harms multiple systems.

N4. c — Hazardous
Levels of pollution: acceptable, hazardous, destructive.

N5. b — Using public transportation
Reduces fuel emissions.

N6. a — Waterborne diseases such as diarrhea and hepatitis A
Contaminated water spreads infection.
