ميدترم كريتكال 2021 · ميدترم ترم أول 2023/2024 (صور الجروب بالإجابات) · فاينال 2021/2022 ترم أول (صور الجروب) · أسئلة سابقة · كويز 1 كريتكال – ترم أول 2023 · كويز 1 كريتكال 2022 · كويز 1 كريتكال 2021

جنب كل سؤال مصدره. لو السؤال اتكرر في كذا امتحان مكتوب كل مرة بمصدرها، وعليه علامة "تكرر". الإجابات كلها في آخر الملف.

اللَّهُمَّ لا سَهْلَ إِلَّا ما جَعَلْتَهُ سَهْلًا، وأنتَ تَجْعَلُ الحَزْنَ إذا شِئْتَ سَهْلًا — صلِّ على النبي ﷺ

Part A · Past Exam Questions

أسئلة الدفعات السابقة

1 فاينال 2021/2022 ترم أول (صور الجروب)

When performing an assessment of a newly admitted patient, the admission assessment is conducted primarily to:

a. Obtain important data
b. Establish a therapeutic relationship
c. Ensure that the patient's skin is intact
d. Diagnose if the patient is at risk for falls

2 ميدترم ترم أول 2023/2024 (صور الجروب بالإجابات)

To examine for adequacy of ventilation and perfusion, the nurse uses ..... assessment.

a. Ongoing
b. Pre-arrival
c. Admission quick check
d. Comprehensive

3 ميدترم كريتكال 2021

Which of the following is a main assessment finding in a patient experiencing difficulty breathing?

a. Diaphragmatic breathing
b. Use of accessory muscles
c. Absence of pursed-lip breathing
d. Bilateral clear breath sounds

4 كويز 1 كريتكال 2021

The critical care nurse understands that assessment of a newly admitted patient is conducted primarily to:

a. Diagnose if the patient is at risk for falls
b. Ensure that the patient's skin is intact
c. Establish a therapeutic relationship
d. Identify important physiological data

5 On initial assessment of a patient with inhalation injury, the nurse noticed that the patient is very confused, experiencing: كويز 1 كريتكال 2021

a. Anxiety
b. Fear
c. Hypoxia
d. Pain

6 Primary assessment of a newly admitted patient to the ICU is conducted to: كويز 1 كريتكال 2022

a. Establish a therapeutic relationship
b. Diagnose the risk for patient's falls
c. Ensure that the patient's skin is intact
d. Identify important physiological data

7 To carry out the technique for consensual reaction to light, the nurse must shine a light in: كويز 1 كريتكال – ترم أول 2023

a. One eye and observe the opposite eye
b. Bridge of nose and observe the opposite
c. Both nose and eye and observe the opposite eye
d. Both eyes simultaneously and observe

8 Which type of painful stimulus should the nurse avoid in a post-traumatic brain injury patient with multiple facial fractures who is unable to perform a motor command? كويز 1 كريتكال – ترم أول 2023

a. Fingernail bed pressure
b. Trapezius squeeze
c. Supraorbital pressure
d. Toenail bed pressure

9 Which assessment finding is an objective sign of chronic oxygen deprivation? كويز 1 كريتكال – ترم أول 2023

a. Continuous cough productive of clear sputum
b. Clubbing of fingernails and barrel-shaped chest
c. Audible inspiratory and expiratory wheeze
d. Chest pain that increases with deep inspiration

10 The abnormal breathing pattern characterized by periods of deep breathing alternating with apnea is known as: كويز 1 كريتكال – ترم أول 2023

a. Bradypnea
b. Tachypnea
c. Cheyne-Stokes breathing
d. Kussmaul's breathing

11 In nursing process, assessing includes all the following, except: أسئلة سابقة

a. Collect data
b. Analyze data
c. Validate data
d. Document data

12 In nursing process, diagnosing includes all the following, except: أسئلة سابقة

a. Analyze data
b. Identify health problems
c. Formulate diagnostic statements
d. Validate data

13 **In nursing process, planning includes all the following, except:** أسئلة سابقة

a. Document nursing activities
b. Prioritize diagnoses
c. Select nursing interventions
d. Write nursing interventions

14 **In nursing process, implementing includes all the following, except:** أسئلة سابقة

a. Reassess the client
b. Supervise delegated care
c. Select nursing interventions
d. Document nursing activities

15 **In nursing process, evaluating includes all the following, except:** أسئلة سابقة

a. Collect data related to outcomes
b. Draw conclusions about problem status
c. Compare data with outcomes
d. Document nursing activities

16 **..... is a process of gathering information about the patient`s physiological ,psychological and spiritual state** أسئلة سابقة

a. Assessment
b. Diagnosing
c. Planning
d. Implementation

17 **Information obtained from diagnosing helps in identifying the immediate and future needs of patient,** أسئلة سابقة

a. True
b. False

18 **Assessment should be done with consistent and systematic approach** أسئلة سابقة

a. True
b. False

19 **Acute life threating problems include which of the following:** أسئلة سابقة

a. Trauma
b. Major surgery
c. Complications of illness
d. All of the above

20 **.....is the intensive care units cater to patients with life-Threatening illnesses and injuries** أسئلة سابقة

a. Critical care environment
b. Obstetric care environment
c. Pediatric care environment
d. Orthopedic care environment

21 **The third stage in the Assessment framework is .....** أسئلة سابقة

a. Pre Arrival Assessment
b. Comprehensive Admission Assessment
c. Ongoing Assessment
d. Admission Quick Check Assessment

22 **..... begins the moment the information is received about the Upcoming admission of the patient** أسئلة سابقة

a. Pre Arrival Assessment
b. Admission Quick Check Assessment
c. Comprehensive Admission Assessment
d. Ongoing Assessment

23 Initial health care team Contact includes which of the following: أسئلة سابقة

a. Paramedics in the field reporting to ED
b. Transfer from another facility
c. Transfer from another areas within the hospital
d. All of the above

24 Admission quick check report on patient provides key information about number of cases أسئلة سابقة

a. True **b.** False

25 Prearrival report contains Potential isolation requirements أسئلة سابقة

a. True **b.** False

26 ..... paints the initial picture of the patient, أسئلة سابقة

a. Pre Arrival Assessment **b.** Admission Quick Check Assessment
c. Comprehensive Admission Assessment **d.** Ongoing Assessment

27 Ongoing assessment allows the critical care nurse to determine the appropriate resources That are needed to care for the patients أسئلة سابقة

a. True **b.** False

28 ..... is obtained immediately upon arrival of the patient أسئلة سابقة

a. Pre Arrival Assessment **b.** Admission Quick Check Assessment
c. Comprehensive Admission Assessment **d.** Ongoing Assessment

29 Admission quick check assessment based on assessing the parameters represented by أسئلة سابقة

a. General appearance **b.** Mental Status
c. ABCDE **d.** All of the above

30 Importance of admission quick assessment includes which of the following ? أسئلة سابقة

a. It allows the critical care nurse to determine the appropriate resources
b. Preparing the environment to meet the specialized needs of the patient
c. Exploring the chief compliant and obtaining essential diagnostic tests
d. Preparing the environment to meet the specialized needs of the patient

31 All of the following are some important points to remember while conducting Admission quick assessment, except: أسئلة سابقة

a. Painting the initial picture of the patient
b. The patient is connected to appropriate monitoring
c. Life-threatening emergent needs can be addressed first
d. Patients allergy status is determined

أسئلة سابقة

32 ..... is based on the immediate assessment of the Environment, the patient's chief complaint and appearance

a. ABCDE
b. Mental Status
c. General Impression
d. All of the above

أسئلة سابقة

33 U in AVPU for assessment mental status refers to .....

a. Alert
b. Responsive to Verbal Stimulus
c. Responsive to Painful Stimulus
d. Unresponsive

أسئلة سابقة

34 In ABCD approach, C refers to.....

a. Circulation
b. Cerebral perfusion
c. Chief complaint
d. All of the above

أسئلة سابقة

35 Patency of the patient's airway is verified by :

a. Having the patient speak
b. Watching the patient's chest rise and fall
c. Both a & b
d. No correct answer

أسئلة سابقة

36 If the airway is compromised, Firstly you should:

a. Inspect the upper airway for presence of blood, vomitus, and foreign
b. Verify that the head has been positioned properly
c. Insert an oral airway, if indicated
d. Note the position/size of the ETT

أسئلة سابقة

37 If the patient already has an artificial airway, Ensure that the airway is secured probably

a. True
b. False

أسئلة سابقة

38 Nonverbal signs of respiratory distress Include which of the following ?

a. Restlessness
b. Calmness
c. Change in physical status
d. All of the above

أسئلة سابقة

39 Assess circulation by:

a. Evaluating level of consciousness (LOC)
b. Quickly palpating a pulse
c. Obtain the blood pressure
d. Both b & c

أسئلة سابقة

40 Evaluating Chief complaint is focused on Evaluating level of consciousness (LOC)

a. True
b. False

أسئلة سابقة

41 Chief complaint assessment focuses on determining the Body systems involved and the extent of associated Symptoms

a. True
b. False

42 You must Check of the dose and rate of the administrated drugs أسئلة سابقة

a. True **b.** False

43 Which of the following is one of the common diagnostic tests obtained during admission quick check assessment: أسئلة سابقة

a. Chest X- ray **b.** ECG

c. Arterial blood gases **d.** All of the above

44 You should Verify the appropriate functioning of all equipment attached to the Patient and label as required أسئلة سابقة

a. True **b.** False

45 Comprehensive assessment is performed to identify any additional problems or changes أسئلة سابقة

a. True **b.** False

46 ..... is an in depth assessment أسئلة سابقة

a. Pre arrival assessment **b.** Admission quick check assessment

c. Comprehensive admission assessment **d.** Ongoing assessment

47 ..... defines the patient's pre-event health status أسئلة سابقة

a. Pre arrival assessment **b.** Admission quick check assessment

c. Comprehensive admission assessment **d.** Ongoing assessment

48 ..... It is the "master computer" of all systems أسئلة سابقة

a. Cardiovascular System **b.** Renal System

c. Endocrine System **d.** Nervous System

49 ..... is the single most important indicator of cerebral Functioning أسئلة سابقة

a. LOC **b.** GCS

c. Both a & b **d.** No correct answer

50 LOC is assessed using GCS أسئلة سابقة

a. True **b.** False

51 Motor Function assessed by which of the following: أسئلة سابقة

a. Have the patient Squeeze the Nurse's hands

b. Plantar flexion

c. Dorsiflexion

d. All of the above

52 If head trauma is involved or suspected, check for Signs of fluid leakage around the nose or ears أسئلة سابقة

a. True **b.** False

53 Mental status assessment includes which of the following ? أسئلة سابقة

a. Developmental delay
b. (dementia)
c. Eye contact
d. All of the above

54 Edema grade..... is the depression in tissue disappears in <2-3 second أسئلة سابقة

a. +1
b. +2
c. +3
d. +4

55 Edema grade +3 Depression in tissue disappears in <1-2 second أسئلة سابقة

a. True
b. False

56 In the assessment of renal system, you should: أسئلة سابقة

a. Evaluate the urine output every 3 to 4 hour
b. Note the amount, clarity and color of the stool
c. Assess presence of blood, glucose, protein in urine
d. All of the above

57 ..... is the first line of defense against infection أسئلة سابقة

a. Immune system
b. Integumentary system
c. Respiratory system
d. Gastrointestinal system

Part B · NCLEX-Style Practice

أسئلة على طريقة NCLEX (إضافة)

N1 The admission quick check (primary survey) of a newly admitted ICU patient primarily follows: NCLEX

a. Head-to-toe review of systems
b. ABCDE assessment
c. Family history
d. Psychosocial interview

N2 A patient opens eyes to pain, makes incomprehensible sounds and withdraws from pain. GCS = NCLEX

a. 6
b. 8
c. 10
d. 12

N3 Select ALL tools used in the neurological assessment of ICU patients. SELECT ALL

a. GCS
b. AVPU
c. RASS
d. CAM-ICU
e. Braden scale

N4 Which painful stimulus should be avoided in a patient with facial fractures? NCLEX

a. Trapezius squeeze
b. Supraorbital pressure
c. Nail-bed pressure
d. Sternal rub

N5 **Cheyne-Stokes respiration is:** NCLEX

a. Deep rapid regular breathing
b. Cycles of deep breathing alternating with apnea
c. Slow shallow breathing
d. Irregular gasping only

N6 **Assessment of a critically ill patient begins:** NCLEX

a. After the physician's examination
b. From the moment the nurse is made aware of the admission
c. After 24 hours
d. At discharge

Part C · Quizlet Flashcards

كروت مراجعة سريعة

غطّي العمود الأبيض بورقة واختبر نفسك: شوف المصطلح وقول التعريف.

Critical care	High-tech ICU with continuous monitoring.	**4 assessment stages**	Pre-arrival, admission quick check, comprehensive, ongoing.
Quick check	ABCDE primary survey.	**AVPU**	Alert, Voice, Pain, Unresponsive.
GCS	Eye 4 + Verbal 5 + Motor 6 = 3–15; coma ≤8.	**Localization**	Moves to remove painful stimulus (M5).
Decorticate	Flexion of arms, extension of legs.	**Decerebrate**	Extension of all extremities.
Consensual reflex	Light in one eye, observe the other.	**Cheyne-Stokes**	Deep breathing alternating with apnea.
Pain tools	BPS, CPOT; sedation RASS; delirium CAM-ICU.	**Skin**	Braden scale; pitting edema grades.

Answer Key

الإجابات

1. a — Obtain important data
أسئلة ECG (برّه القائمة) والأدوية في الفاينال ده اتشالت.

2. c — Admission quick check
الورقة معلّمة ongoing — حسب الملخص الـ admission quick check بيشمل ABCs (دورة دموية + اعتمدنا(تهوية ؛ admission quick check (مقترحة).

3. b — Use of accessory muscles

4. d — Identify important physiological data

5. c — Hypoxia

6. d — Identify important physiological data

7. a — One eye and observe the opposite eye

8. c — Supraorbital pressure
الطالب اختار supraorbital pressure وده الصح: تجنّب الضغط فوق الحاجب مع كسور الوجه.

9. b — Clubbing of fingernails and barrel-shaped chest
الطالب اختار chest pain — الصح clubbing + barrel chest (علامات نقص الأكسجين المزمن).

10. c — Cheyne-Stokes breathing

11. b — Analyze data

12. d — Validate data

13. a — Document nursing activities

14. c — Select nursing interventions

15. d — Document nursing activities

16. a — Assessment

17. b — False

18. a — True

19. d — All of the above

20. a — Critical care environment

21. b — Comprehensive Admission Assessment

22. a — Pre Arrival Assessment

23. d — All of the above

24. b — False

25. a — True

26. a — Pre Arrival Assessment

27. b — False

28. b — Admission Quick Check Assessment

29. d — All of the above

30. c — Exploring the chief compliant and obtaining essential diagnostic tests

31. a — Painting the initial picture of the patient

32. c — General Impression

33. c — Responsive to Painful Stimulus

34. a — Circulation

35. c — Both a & b

36. b — Verify that the head has been positioned properly

37. a — True

38. a — Restlessness

39. d — Both b & c

40. b — False

41. a — True

42. a — True

43. d — All of the above

44. a — True

45. b — False

46. c — Comprehensive admission assessment

47. c — Comprehensive admission assessment

48. d — Nervous System

49. a — LOC

50. a — True

51. d — All of the above

52. a — True

53. d — All of the above

54. c — +3

55. b — False

56. c — Assess presence of blood, glucose, protein in urine

57. b — Integumentary system

N1. b — ABCDE assessment
The quick check identifies immediate threats: airway, breathing, circulation, disability, exposure.

N2. b — 8
E2 + V2 + M4 = 8.

N3. a, b, c, d — GCS; AVPU; RASS; CAM-ICU
Braden assesses pressure-ulcer risk.

N4. b — Supraorbital pressure
Supraorbital pressure can worsen facial injury.

N5. b — Cycles of deep breathing alternating with apnea
Seen with brain injury or heart failure; Kussmaul = deep rapid (acidosis).

N6. b — From the moment the nurse is made aware of the admission
Pre-arrival assessment prepares the room and equipment.
