pediatric Quiz) ملف كويز) · كويز 2 – 2021 · ميدترم 2024 (ترم أول 2023-2024) · ميدترم 2022

جنب كل سؤال مصدره. لو السؤال اتكرر في كذا امتحان مكتوب كل مرة بمصدرها، وعليه علامة "تكرر". الإجابات كلها في آخر الملف.

اللَّهُمَّ لا سَهْلَ إِلَّا ما جَعَلْتَهُ سَهْلًا، وأنتَ تَجْعَلُ الحَزْنَ إذا شِئْتَ سَهْلًا — صلِّ على النبي ﷺ

Part A · Past Exam Questions

أسئلة الدفعات السابقة

1 ميدترم 2022

The nurse plans to instruct the mother about measures to prevent breast engorgement. The nurse should tell her to:

a. Breastfeed the neonate frequently
b. Wear a supportive brassiere with nipple shields
c. Restrict fluid intake for 24 to 48 hours
d. Feed the neonate for only 5 minutes per side on the first day

2 ميدترم 2022

A new mother asks why she should feed her newborn colostrum. The nurse's most appropriate answer is because it is:

a. Helping the mother learn how to breastfeed before she goes home
b. High in antibodies, protein, vitamins, and minerals
c. Not real milk
d. Lower in calories than milk and should be supplemented by formula

3 ميدترم 2024 (ترم أول 2023-2024)

The nurse should instruct the mother that colostrum provides the neonate with:

a. More fats than breast milk has
b. Required vitamin K for the neonate
c. Iron needed till age of 6 months
d. Antibodies that the neonate lacks

4 ميدترم 2024 (ترم أول 2023-2024)

Which of the following statements is correct when teaching a mother about breastfeeding?

a. Initiate breastfeeding within 4 hours after birth
b. Encourage breastfeeding daily every 3 hours
c. Give only breast milk for the first 6 months of age
d. Allow artificial teats or pacifiers to breastfed infants

5 A new mother asks whether she should feed her newborn colostrum. The nurse's most appropriate answer is: كويز 2 – 2021

a. Colostrum is high in antibodies, protein, vitamins, and minerals
b. Colostrum is lower in calories than milk and should be supplemented by formula
c. Colostrum is important as it is rich in iron
d. Colostrum is unnecessary for newborns

6 The nurse plans to instruct the mother about the measures to prevent breast engorgement: كويز 2 – 2021

a. Wear a supportive brassiere with nipple shields
b. Administer fluid intake for 24 to 48 hours
c. Breastfeed the neonate frequently
d. Feed the neonate for only 5 minutes per side on the first day

7 The indicators of successful breastfeeding include the following EXCEPT: كويز (ملف pediatric Quiz)

a. Urinary output and defecation
b. Excessive sweating
c. Increase in body weight
d. Calm sleeping

8 Which of the following statements is most relevant to exclusive breastfeeding? كويز (ملف pediatric Quiz)

a. Early initiation and for six months
b. Day and night, scheduled
c. On demand and allowing water
d. For six months at daytime only

9 To ensure successful breastfeeding the child must: كويز (ملف pediatric Quiz)

a. Play with his mother
b. Sleep before feeding
c. Latch on well to the breast
d. Be bathed before feeding

Part B · NCLEX-Style Practice

أسئلة على طريقة NCLEX (إضافة)

N1 A mother asks why her baby should get colostrum. The best answer is that colostrum is: NCLEX

a. Lower in protein than mature milk
b. Rich in antibodies (IgA) and acts as the baby's first immunization
c. Mainly water and has no nutritional value
d. High in fat to help weight gain

N2 Which hormone is responsible for the milk let-down (ejection) reflex? NCLEX

a. Prolactin
b. Oxytocin
c. Estrogen
d. Progesterone

N3 Select ALL signs that a breastfed infant is receiving enough milk. SELECT ALL

a. 6 or more wet diapers per day
b. Steady weight gain
c. Calm sleeping after feeds
d. Excessive sweating during feeds
e. Crying immediately after every feed

N4 **Which nutrient is NOT sufficient in breast milk and should be supplemented?** NCLEX

a. Vitamin C
b. Vitamin D
c. Lactose
d. Water

N5 **According to WHO/UNICEF, breastfeeding should be initiated:** NCLEX

a. Within 1 hour of birth
b. After 6 hours
c. After the first bath
d. When milk 'comes in' on day 3

N6 **Complementary feeding should start at:** NCLEX

a. 2 months
b. 4 months
c. 6 months while breastfeeding continues
d. 12 months after stopping breastfeeding

Part C · Quizlet Flashcards

كروت مراجعة سريعة

غطّي العمود الأبيض بورقة واختبر نفسك: شوف المصطلح وقول التعريف.

Colostrum	First thick yellow milk; rich in protein and IgA; first immunization; laxative effect.	**Prolactin reflex**	Anterior pituitary; milk production in response to suckling (supply = demand).
Oxytocin reflex	Posterior pituitary; let-down/ejection; reduced by worry, pain, stress.	**Foremilk vs hindmilk**	Foremilk: watery, quenches thirst. Hindmilk: fat-rich, gives satiety and calories.
Breast milk whey:casein	About 90:10 early — easy to digest.	**Vitamin lacking in breast milk**	Vitamin D.
Exclusive breastfeeding	Only breast milk (no water) for the first 6 months.	**Initiation**	Within 1 hour of birth (WHO step 4).
Signs of good attachment	Mouth wide open, lower lip turned out, chin touches breast, more areola above than below.	**Adequate intake signs**	≥6 wet diapers/day, weight gain, calm sleep after feeds.
Complementary feeding	Start at 6 months; does not replace breast milk.	**Benefits to mother**	Lactational amenorrhea, uterine involution, less breast/ovarian cancer, less anemia.

Answer Key

الإجابات

1. a — Breastfeed the neonate frequently

2. b — High in antibodies, protein, vitamins, and minerals

3. d — Antibodies that the neonate lacks

4. c — Give only breast milk for the first 6 months of age

5. a — Colostrum is high in antibodies, protein, vitamins, and minerals

6. c — Breastfeed the neonate frequently

7. b — Excessive sweating

8. a — Early initiation and for six months

9. c — Latch on well to the breast

N1. b — Rich in antibodies (IgA) and acts as the baby's first immunization
Colostrum is rich in protein and secretory IgA, gives passive immunity and has a laxative effect that helps pass meconium.

N2. b — Oxytocin
Oxytocin from the posterior pituitary causes milk ejection; it is affected by emotions (worry, pain and stress reduce it).

N3. a, b, c — 6 or more wet diapers per day; Steady weight gain; Calm sleeping after feeds
Adequate urine output, weight gain and contentment after feeds indicate successful breastfeeding.

N4. b — Vitamin D
Breast milk contains all vitamins in adequate amounts except vitamin D.

N5. a — Within 1 hour of birth
Step 4 of the 10 steps: help mothers start breastfeeding within one hour of birth.

N6. c — 6 months while breastfeeding continues
Breast milk alone covers needs for the first 6 months; then complementary foods are added without replacing breast milk.
