CAIRO UNIVERSITY · FACULTY OF NURSING · NURSING EDUCATION DEPT

Assessment of *Learning Needs*

Comprehensive Summary of Core Definitions (Need, Learning, Learning Needs Assessment), Significance in the Educational Process, Four Types of Learning Needs, Key Assessment Questions, Ten Systematic Assessment Steps, Priority Hierarchy (Mandatory, Desirable, Possible), Assessment Methods, Basic Requirements, and the Role of the Nurse Educator.

Lecture Summary · **Nursing Education Department** · *Cairo University*

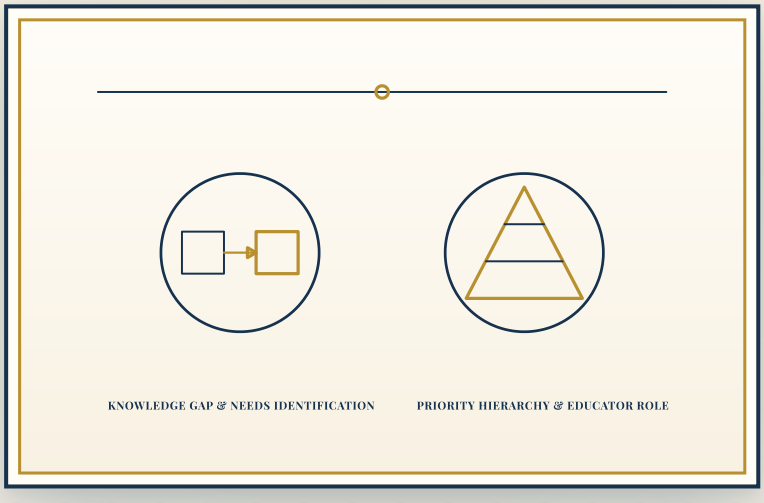

PLATE I — *Bridging the discrepancy between actual and expected performance (left), paired with the three-tier prioritization pyramid: Mandatory, Desirable, and Possible learning needs (right).*

Duas Before Studying

ابدأ مذاكرتك بهذه الأدعية المباركة لتيسير الفهم والحفظ والعلم النافع:

دعاء الفهم

اللَّهُمَّ إِنِّي أَسْأَلُكَ فَهْمَ النَّبِيِّينَ، وَحِفْظَ الْمُرْسَلِينَ، وَالْمَلَائِكَةِ الْمُقَرَّبِينَ

دعاء قبل المذاكرة

اللَّهُمَّ افْتَحْ عَلَيَّ فُتُوحَ الْعَارِفِينَ بِحِكْمَتِكَ، وَيَسِّرْ لِي أَمْرِي، وَاشْرَحْ لِي صَدْرِي بِمَعْرِفَتِكَ

دعاء العلم النافع

اللَّهُمَّ إِنِّي أَسْأَلُكَ عِلْمًا نَافِعًا، وَرِزْقًا طَيِّبًا، وَعَمَلًا مُتَقَبَّلًا

دعاء سيدنا موسى عليه السلام

رَبِّ اشْرَحْ لِي صَدْرِي، وَيَسِّرْ لِي أَمْرِي، وَاحْلُلْ عُقْدَةً مِنْ لِسَانِي يَفْقَهُوا قَوْلِي

نية المذاكرة

نَوَيْتُ بِمُذَاكَرَتِي هَذِهِ خِدْمَةَ مَرْضَى الْمُسْلِمِينَ وَنَفْعَ أُمَّةِ نَبِيِّكَ مُحَمَّدٍ ﷺ

دعاء تيسير العلم

اللَّهُمَّ لَا سَهْلَ إِلَّا مَا جَعَلْتَهُ سَهْلًا، وَأَنْتَ تَجْعَلُ الْحَزْنَ إِذَا شِئْتَ سَهْلًا

إرشاد للمذاكرة: يغطي هذا الملخص محاضرة وكتاب قسم تعليم التمريض بجامعة القاهرة بالكامل طبقًا للنص الرسمي (Assessment of Learning Needs — تقييم احتياجات التعلم) حرفيًا مع جميع الجداول والمخططات وأسئلة التقييم الذاتي الرسمية بالكلية.

1. Introduction, Core Definitions & Importance of Needs Assessment

1. Introduction & Core Definitions

Introduction: A **Learning Needs Assessment** is a vital and crucial tool in the educational process, ensuring that learning initiatives are **purposeful, focused, and impactful**. By systematically identifying and addressing learners' **specific needs**, educators and institutions can enhance the effectiveness of their programs, resulting in better **performance, satisfaction, and overall outcomes**.

CONCEPT	EXACT OFFICIAL DEFINITION IN LECTURE
1- A "Need"	— Represents the difference between the **current situation (what exists)** and the **desired outcome (what should be)**. — It is not simply the present or the future state, but the **gap or discrepancy** that separates the two.
2- "Learning"	— Learning is the **acquisition of knowledge, skills and attitudes**. — It involves new ways of doing things and operates in an individual's attempts to overcome obstacles or to readjust to new situations. — It represents **progressive change in behavior** and enables the individual to satisfy interest to attain goals.
3- "Learning Needs Assessment"	— A **systematic process of obtaining information** to determine learning goals to **close the gap** between what the learners currently know and what they need to know to achieve competency. **"It is figuring out what you need to teach."** — *"The process of identifying gaps between current and desired outcomes, specifically the difference between the actual and the expected levels of performance or knowledge"* (**HealthCare Education Associates, 1989**). — The process of identifying the gap between **what someone knows** and **what someone needs or wants to know**. — **Note:** Gaps may arise because of a **lack of knowledge, attitude, or skill**.

2. Importance of Learning Needs Assessment in the Educational Process (15 Points)

DIRECT INSTRUCTIONAL & LEARNER BENEFITS

— **1. Identifies Learning Needs.**
— **2. Informs Design of Learning Experiences.**
— **3. Enhances quality of teaching/care.**
— **4. Facilitates goal setting and planning.**
— **5. Enables effective evaluation of learning outcome.**
— **6. Optimizes learning environment.**
— **7. Saves time and energy.**
— **8. Supports effective communication.**
— **9. Motivates the learner.**

INSTITUTIONAL, CURRICULAR & STRATEGIC BENEFITS

— **10. Adapt to changing needs:** Identify industry trends and student preferences to adjust curricula and delivery methods.

— **11. Enhance student experience:** Create inclusive and accessible learning environments that cater to diverse needs.

— **12. Support faculty development:** Provide targeted professional development to improve teaching and research.

— **13. Optimize resource allocation:** Make informed decisions about budget distribution to maximize impact.

— **14. Promote continuous improvement:** Foster a culture of evaluation and innovation.

— **15. Meet accreditation standards:** Demonstrate commitment to quality and student success.

1. المقدمة، التعريفات الأساسية، وأهمية تقييم احتياجات التعلم:
• **المفاهيم الثلاثة الأساسية:** (1) **الاحتياج (Need):** هو الفجوة أو التباين (**Gap or discrepancy**) بين الوضع الحالي (ما هو قائم) والنتيجة المرجوة (ما يجب أن يكون). (2) **التعلم (Learning):** هو اكتساب المعارف والمهارات والاتجاهات، ويمثل تغيرًا تدريجيًا في السلوك للتغلب على العقبات أو التكيف مع المواقف الجديدة. (3) **تقييم احتياجات التعلم (Learning Needs Assessment):** عملية منهجية لجمع المعلومات لتحديد أهداف التعلم وسد الفجوة بين ما يعرفه المتعلم حاليًا وما يحتاج لمعرفته لتحقيق الكفاءة («معرفة ما تحتاج إلى تدريسه»)، وقد تنشأ الفجوات بسبب **نقص في المعرفة أو الاتجاه أو المهارة.**
• **أهمية تقييم الاحتياجات (15 نقطة):** تحديد احتياجات التعلم، توجيه تصميم الخبرات التعليمية، تحسين جودة التدريس/الرعاية، تسهيل وضع الأهداف والتخطيط، تقييم مخرجات التعلم بفعالية، تحسين بيئة التعلم، توفير الوقت والجهد، دعم التواصل الفعال، تحفيز المتعلم، التكيف مع الاحتياجات المتغيرة، تعزيز تجربة الطالب، دعم تطوير أعضاء هيئة التدريس، تحسين تخصيص الموارد والميزانية، تعزيز التحسين المستمر، وتلبية معايير الاعتماد.

2. Types of Learning Needs Assessment & Key Assessment Questions

1. Four Types of Learning Needs Assessment

TYPE OF NEED	LEARNER STATEMENT	CHARACTERISTICS & HOW IT IS IDENTIFIED
1- Self-recognized or Perceived Needs	*"I know what I want and need to know"*	— Needs that learners are **aware of and can articulate**. — They represent the individual's own understanding of what they need to learn or improve.
2- Unknown to the Learner or Unperceived Needs	*"I don't know what I don't know"*	— These needs are **not recognized by the learners themselves**. — They need to be assessed or need an **external analysis** to be identified.
3- Miscalculated or Misperceived Needs	*"I think I know something I don't"*	— Learners may **believe they understand** a concept or process when, in fact, they have **misunderstood it**. — This type of need can be uncovered through **assessment or performance review**.
4- Emergent Needs	*Real-time / New Situations*	— Arise when **new information or changes in the environment** create a new learning requirement that was not previously recognized. — Adapts to **immediate challenges or unforeseen circumstances**; identifies what is needed in real-time as new situations arise.

1. الأنواع الأربعة لتقييم احتياجات التعلم (Types of Learning Needs Assessment):
• **1) الاحتياجات المُدرَكة ذاتيًا (Self-recognized / Perceived Needs):** «أنا أعرف ما أريد وأحتاج معرفته» — احتياجات يعيها المتعلم ويستطيع التعبير عنها بنفسه.
• **2) الاحتياجات غير المُدرَكة (Unknown / Unperceived Needs):** «أنا لا أعرف ما لا أعرفه» — احتياجات لا يدركها المتعلم بنفسه وتحتاج إلى تقييم أو تحليل خارجي لاكتشافها.
• **3) الاحتياجات الخاطئة التقدير (Miscalculated / Misperceived Needs):** «أظن أنني أعرف شيئًا بينما أنا لا أعرفه» — يعتقد المتعلم أنه يفهم مفهومًا أو إجراءً بينما هو يفهمه بشكل خاطئ، وتُكشف عبر التقييم أو مراجعة الأداء.
• **4) الاحتياجات الطارئة/المستجدة (Emergent Needs):** تنشأ عند ظهور معلومات جديدة أو تغيرات في البيئة تفرض متطلبات تعلم جديدة لم تكن معروفة سابقًا للتكيف مع التحديات الفورية.

2. Six Key Questions for a Needs Assessment

KEY QUESTION	CORRESPONDING EDUCATIONAL COMPONENT
1. Why?	**Objectives**
2. What?	**Content**
3. Who?	**Age, number, gender, education & background knowledge, language**
4. Where?	**Setting, resources**
5. When?	**Time & timing**
6. How?	**Teaching strategies / methods**

2. الأسئلة الستة المفتاحية لتقييم الاحتياجات (Key Questions for a Needs Assessment):
• **1. لماذا (Why?)** ← الأهداف (**Objectives**) | **2. ماذا (What?)** ← المحتوى (**Content**) | **3. مَن (Who?)** ← خصائص المتعلمين: العمر، العدد، النوع، التعليم والمعرفة السابقة، واللغة | **4. أين (Where?)** ← المكان والموارد (**Setting, resources**) | **5. متى (When?)** ← الوقت والتوقيت (**Time & timing**) | **6. كيف (How?)** ← استراتيجيات وطرق التدريس (**Teaching strategies/methods**).

3. Steps of Needs Learning Assessment (Steps 1 to 6)

Steps 1 to 5: Learner Identification, Setting, Data Collection & Team Collaboration

1. IDENTIFY THE LEARNER & 2. CHOOSE THE RIGHT SETTING

— **1. Identify the learner:**
· Who is the audience? If one individual, is there a single need or many needs to be fulfilled?
· If more than one learner, are their needs **congruent or diverse**?
· Development of education programs must be based on **accurate identification of the learner**.

— **2. Choose the right setting:**
· Establishing a **trusting environment** helps learners feel a sense of security in confiding information, believe their concerns are taken seriously and considered important, and feel respected.
· Ensuring **privacy and confidentiality** is essential to establishing a trusting relationship.

3. COLLECT DATA ABOUT LEARNER, 4. FROM LEARNER & 5. TEAM

— **3. Collect data about the learner:** Identifies type/extent of content and educational strategies. Gathers both **quantitative** (test scores, grades, attendance) and **qualitative** (observations, stakeholders' opinion) data. Key methods: **formative assessments** and tracking behavioral patterns.

— **4. Collect data from the learner:** Learners are usually the **most important source** of data about themselves. Seek info from staff/students on practice areas where they need new/additional info. Actively engaging learners in defining their own problems/needs **motivates them to learn**.

— **5. Involve members of the healthcare team/stakeholders:** Nurse educators are not the sole educators; collaborate with other healthcare team members for a richer assessment and to save precious time.

Step 6: Prioritize Needs (Mandatory, Desirable, and Possible Hierarchy)

Prioritizing needs in nursing education is a strategic exercise in **resource allocation and risk management**, requiring educators to move beyond simply listing deficiencies and instead construct a defensible hierarchy based on urgency and importance:

PRIORITY LEVEL	DEFINITION & URGENCY	OFFICIAL NURSING EXAMPLES
1. Mandatory ***(Immediate Action Required)***	— Needs that **must be learned for survival** or situations in which the learner's **life, safety, or ability to function** at an expected level is threatened. — Learning needs in this category **must be met immediately**.	— **Basic Life Support (BLS) Certification** for all bedside nurses. — **Safe medication administration competency**, including high-alert medications (e.g., **heparin, insulin**).
2. Desirable ***(Important for Development & Excellence)***	— Needs that are **useful and worthwhile** (not life-dependent / not essential) but related to **learner satisfaction, well-being, overall ability to provide high-quality care** in situations involving changes in institutional procedure, or personal/professional advancement.	— **Advanced cardiac life support (ACLS)** for all medical-surgical nurses, not just critical care.
3. Possible ***(Lower Priority / Nice to Know)***	— Needs for information that is **nice to know** but not essential or required, or not directly related to being able to function in daily activities (can be deferred without negative consequences).	— Learning to operate in **virtual care environments**. — How to make **surgical knot in operating room**.

خطوات تقييم احتياجات التعلم (الخطوات 1 إلى 6):
• **الخطوات 1–5:** (1) **تحديد المتعلم** (فرد أم مجموعة، وهل احتياجاتهم متطابقة أم متنوعة)، (2) **اختيار المكان المناسب** (توفير بيئة موثوقة تضمن الخصوصية والسرية)، (3) **جمع بيانات عن المتعلم**: كمية (درجات الاختبارات، الحضور) ونوعية (الملاحظات، آراء المعنيين، التقييمات التكوينية)، (4) **جمع بيانات من المتعلم نفسه**: المتعلمون هم أهم مصدر للبيانات عن أنفسهم وإشراكهم يحفزهم للتعلم، (5) **إشراك أعضاء فريق الرعاية الصحية وأصحاب المصلحة.**
• **الخطوة 6 — ترتيب الأولويات (Prioritize needs):** تنقسم إلى 3 مستويات: **(1) إلزامية (Mandatory):** ضرورية للبقاء أو عند تهديد حياة أو سلامة المتعلم ويجب تلبيتها **فورًا** (مثل شهادة **BLS** وإعطاء الأدوية عالية الخطورة كالهيبارين والأنسولين)؛ **(2) مرغوبة (Desirable):** مفيدة وترتبط بالرفاهية وجودة الرعاية والتطور المهني وتغيرات إجراءات المؤسسة (مثل **ACLS** لممرضي الباطنة والجراحة)؛ **(3) ممكنة (Possible):** معلومات «من الجيد معرفتها» (**Nice to know**) وليست ضرورية للأنشطة اليومية (مثل بيئات الرعاية الافتراضية أو العقد الجراحية).

4. Steps of Needs Learning Assessment (Steps 7 to 10)

Steps 7 to 10: Information Filtering, Resources, Organizational Demands & Time Management

ASSESSMENT STEP	DETAILED GUIDELINES & PRINCIPLES IN LECTURE
7. Provide Only Need- or Want-to-Know Information	— Without good assessment, a common mistake is to provide **more information than the patient wants or needs**. — To avoid this problem, the nurse must discriminate between information that patients **need to know** versus information that is **nice to know**. — Recognize that **education in and of itself is not always the answer to a problem**: when something goes wrong, when a patient is not following a prescribed regimen, or when a staff member does not adhere to a protocol, **always look for other reasons** for these types of behaviors.
8. Determine Availability of Educational Resources	— The educator may identify a need, but it may be **useless to proceed with interventions** if proper educational resources are **not available, unrealistic to obtain, or do not match the learner's needs**. — In this case, it is better to focus on other identified needs until the necessary equipment and materials for instruction are available for future teaching encounters.
9. Assess the Demands of the Organization	— What are the organization's **philosophy, mission, strategic plan, and goals**? — The educator should be familiar with **standards of performance** required in various employee categories, along with **job descriptions** and **hospital, professional, and agency regulations** that dictate the educational focus to satisfy the learning needs of both consumers and employees.
10. Take Time-Management Issues into Account	— Time constraints pose a major challenge, but completing a **thorough initial assessment saves more time later** by preventing the need to revisit missing information. — Learners should be given the opportunity to express their perceptions, preferences, and learning needs (encourages engagement and supports a **learner-centered approach**, especially for adults who value **self-direction**). — Assessments can occur **formally or informally** at any time during patient care activities (such as **rounds or bathing**) or during casual interactions with staff (such as in **hallways or break areas**). — **Informing patients, families, students, or staff in advance** about planned discussions allows them to reflect on their concerns and prepare questions. — **Minimizing interruptions** during assessment sessions increases efficiency, enabling the educator to accomplish in **15 focused minutes** what might otherwise take an hour.

Key Takeaway on Efficiency & Non-Educational Causes:
1) Discriminating **need-to-know** from **nice-to-know** prevents learner overload.
2) Non-compliance with a regimen or protocol is not always an educational deficit—always investigate other underlying causes.
3) Minimizing interruptions allows an educator to complete in **15 focused minutes** what would otherwise take a full hour.

خطوات تقييم احتياجات التعلم (الخطوات 7 إلى 10):
• **7. تقديم المعلومات الضرورية فقط (Need-to-know vs. Nice-to-know):** من الأخطاء الشائعة غياب التقييم وتقديم معلومات أكثر مما يحتاجه المريض؛ لذا يجب التمييز بين ما **يحتاج لمعرفته (Need to know)** وما هو **لطيف معرفته (Nice to know)**، مع إدراك أن **التعليم وحده ليس دائمًا هو الحل للمشكلة** عند عدم التزام المريض بالعلاج أو الموظف بالبروتوكول.
• **8. تحديد توافر الموارد التعليمية و9. تقييم متطلبات المؤسسة:** لا جدوى من البدء بالتدريس إذا كانت الموارد والأجهزة غير متوفرة أو غير ملائمة، ويجب الإلمام بفلسفة المؤسسة ورسالتها وخطتها الاستراتيجية ومعايير الأداء والوصف الوظيفي واللوائح.
• **10. مراعاة إدارة الوقت (Time-management):** التقييم الأولي الشامل يوفر الوقت لاحقًا، ويمكن إجراء التقييم **رسميًا أو غير رسمي** أثناء رعاية المرضى (المرور أو الاستحمام) أو التفاعلات غير الرسمية مع الموظفين، كما أن **تقليل المقاطعات** يمكّن المعلم من إنجاز ما يستغرق ساعة كاملة في **15 دقيقة مركزة فقط.**

5. Methods & Basic Requirements to Assess Learning Needs

1. Six Methods to Assess Learning Needs

Needs assessment is a vital step in the educational process; to ensure its effectiveness, it is important to select the appropriate methods for collecting information about the specific issues and the learner population:

METHOD	DESCRIPTION, DATA TYPE & EDUCATIONAL PURPOSE
1. Observations	— Involve observing the behavior of individuals or groups in their **natural (usual) environment**. — Provides valuable insights into the **needs, skills, gaps, and behaviors** of the population being served and helps identify **potential barriers** to achieving the desired outcome.
2. Surveys	— A common method used to gather information from **many people quickly and efficiently** through structured questionnaires. — Can be administered **online, through email, or in person**, and can be designed to collect both **quantitative and qualitative data**.
3. Focus Groups	— A **qualitative method** of needs assessment that involves gathering a **small group of people** to discuss a specific topic. — Provides **in-depth information** about the **attitudes, beliefs, and experiences** of the population being served, and helps identify potential solutions to the problem.
4. Interviews	— A **one-on-one method** of needs assessment used to gather detailed information about the **perspectives and experiences of individuals**. — Can be conducted **in person, over the phone, or via video conferencing**, and can be used to collect both **qualitative and quantitative data**.
5. Document Reviews	— Involve analyzing **existing data, reports, assessments, records, and documents** related to the problem and the population being served. — Provides important **context and background information** and helps identify potential **gaps in knowledge** that need to be addressed.
6. Needs Assessments by Experts	— Conducted by **experts/specialists in a specific field**, such as education or healthcare. — Experts use their **knowledge and experience** to diagnose/identify the needs of the population being served and develop appropriate solutions.

2. Five Basic Requirements to Assess Learning Needs

1. CLEAR OBJECTIVES & 2. TARGET AUDIENCE

— **1. Clear Objectives:** Define what you aim to achieve with the learning program or educational intervention.

— **2. Target Audience Understanding:** Know who the learners are, including their current knowledge level, learning styles, and backgrounds.

— **3. Stakeholder Engagement:** Involve all relevant stakeholders in the process to ensure that the assessment is comprehensive and considers multiple perspectives.

4. FEEDBACK MECHANISMS & 5. EXPERTISE

— **4. Feedback Mechanisms:** Create channels through which learners can provide feedback about their learning needs and experiences.

— **5. Expertise:** Ensure that those conducting the needs assessment have the necessary expertise to interpret the data and make informed decisions.

طرق ومتطلبات تقييم احتياجات التعلم:

• **الطرق الست لتقييم الاحتياجات (Methods to Assess Learning Needs):** (1) **الملاحظة (Observations):** مراقبة سلوك الأفراد أو المجموعات في بيئتهم الطبيعية لتحديد المهارات والفجوات والعوائق؛ (2) **الاستبيانات/المسوح (Surveys):** جمع بيانات كمية ونوعية من عدد كبير بسرعة وكفاءة (إلكترونيًا أو بالبريد أو حضوريًا)؛ (3) **مجموعات التركيز (Focus Groups):** طريقة نوعية (Qualitative) تجمع مجموعة صغيرة لمناقشة موضوع محدد بعمق لمعرفة الاتجاهات والمعتقدات والخبرات؛ (4) **المقابلات (Interviews):** طريقة فردية (One-on-one) حضوريًا أو هاتفيًا أو عبر الفيديو لجمع بيانات نوعية وكمية مفصلة؛ (5) **مراجعة الوثائق (Document Reviews):** تحليل البيانات والتقارير والسجلات الموجودة؛ (6) **تقييم الاحتياجات بواسطة الخبراء (Needs Assessments by Experts).**

• **المتطلبات الأساسية الخمسة لتقييم الاحتياجات:** (1) **أهداف واضحة (Clear Objectives)**، (2) **فهم الجمهور المستهدف (Target Audience Understanding)**، (3) **إشراك أصحاب المصلحة (Stakeholder Engagement)**، (4) **آليات التغذية الراجعة (Feedback Mechanisms)**، و(5) **الخبرة (Expertise)** لتفسير البيانات واتخاذ قرارات مستنيرة.

6. Role of Nurse as Educator & Official Self-Evaluation MCQs

1. Role of Nurse as Educator (12 Core Responsibilities)

ASSESSMENT, PLANNING & PROGRAM DESIGN

— **1.** Assess learning needs for learners.

— **2.** Developing program in collaboration with instructors.

— **3.** Develop budgets, hiring and supervising staff.

— **4.** Facilitating learning through classroom lectures, hands-on training, and online courses, assessing educational needs and learner outcomes.

— **5.** Designing, implementing, evaluating and revising academic and continuing education programs for nurses.

— **6.** Determine that information given is received and understood.

MOTIVATION, EVALUATION & LEARNER FOLLOW-UP

— **7.** Ensure that students who pass educational program are prepared for promoting health care.

— **8.** Promote learning and provide conducive environment to motivate individuals to learn.

— **9.** Provide regular feedback from learners.

— **10.** Evaluate the effectiveness of the programs.

— **11.** Follow up learners to identify progress being made.

— **12.** Help students and practicing nurses identify their learning needs, strengths and limitations, and select learning opportunities that will build on strengths and overcome limitations.

دور الممرض كمعلم (Role of Nurse as Educator — 12 دورًا):

• يشمل دور معلم التمريض: تقييم احتياجات التعلم، تطوير البرامج بالتعاون مع المدربين، إعداد الميزانيات وتوظيف والإشراف على العاملين، تيسير التعلم عبر المحاضرات والتدريب العملي والدورات الإلكترونية، تصميم وتنفيذ وتقييم ومراجعة برامج التعليم الأكاديمي والمستمر، التأكد من استيعاب المعلومات، ضمان جاهزية الخريجين لتعزيز الرعاية الصحية، توفير بيئة محفزة للتعلم، تقديم تغذية راجعة منتظمة، تقييم فعالية البرامج، متابعة تقدم المتعلمين، ومساعدة الطلاب والممرضين الممارسين على تحديد نقاط قوتهم وحدودهم.

2. Official Self-Evaluation Questions (Page 15 Verbatim)

1 **In learning needs assessment, what is the primary focus of identifying "unperceived needs"?**

- ◯ a) Addressing gaps already recognized by learners.
- ◯ b) Evaluating environmental factors affecting learning.
- ◯ c) Developing solutions based on self-reported learner data.
- ◯ **d) Discovering needs learners are unaware of themselves ✓**

الإجابة الرسمية: **d) Discovering needs learners are unaware of themselves** — الاحتياجات غير المُدرَكة (**"Unperceived needs: "I don't know what I don't know**) تركز على اكتشاف الاحتياجات التي لا يعيها المتعلمون بأنفسهم عبر تحليل خارجي.

2 **A systematic process of obtaining information in order to determine learning goals to close the gap between what the learners currently knows and what they need to know in order to achieve competency. This is a definition of:**

- ◯ **a) Learning needs assessment ✓**
- ◯ b) Teaching learning process
- ◯ c) A need
- ◯ d) Learning

الإجابة الرسمية: **a) Learning needs assessment** — هذا هو التعريف الرسمي لتقييم احتياجات التعلم (عملية منهجية لجمع المعلومات لتحديد أهداف التعلم وسد الفجوة لتحقيق الكفاءة).

3 **A nurse educator wants to assess students' competency in medication administration. Which method is MOST appropriate?**

- ◯ a) Reviewing theoretical exam scores only
- ◯ **b) Observing students during clinical simulations ✓**
- ◯ c) Asking students to self-report their confidence levels
- ◯ d) Testing only on drug names

الإجابة الرسمية: **b) Observing students during clinical simulations** — ملاحظة الطلاب أثناء المحاكاة الإكلينيكية (Observations) هي الطريقة الأنسب لتقييم الكفاءة العملية والمهارات الفعلية في إعطاء الدواء.

4 **Before designing a workshop on wound care, how should a nurse educator identify gaps in students' knowledge?**

- ◯ a) Assume all students need the same content
- ◯ **b) Administer a pre-workshop knowledge quiz ✓**
- ◯ c) Copy another institution's wound care curriculum
- ◯ d) Skip assessment to save time

الإجابة الرسمية: **b) Administer a pre-workshop knowledge quiz** — إجراء اختبار معرفي قبلي يحدد الفجوات المعرفية الفعلية لدى الطلاب قبل تصميم ورشة العمل.

5 **A needs assessment reveals that 60% of nursing students lack confidence in ECG interpretation. What does this data MOST likely indicate?**

- ◯ a) The curriculum adequately covers ECG content
- ◯ **b) Students need additional hands-on ECG training ✓**
- ◯ c) ECG skills are irrelevant to nursing practice
- ◯ d) Students are overconfident in their abilities

الإجابة الرسمية: **b) Students need additional hands-on ECG training** — نقص ثقة 60% من الطلاب في تفسير رسم القلب يشير إلى وجود فجوة تدريبية تتطلب تدريبًا عمليًا إضافيًا.

مفتاح الإجابات الرسمي للكلية (ص 15):

- **1:** **d** (Discovering needs learners are unaware of themselves) | **2: a** (Learning needs assessment) | **3: b** (Observing students during clinical simulations.) | **4: b** (Administer a pre-workshop knowledge quiz) | **5: b** (Students need additional hands-on ECG training)

Closing

كفارة المجلس

سُبْحَانَكَ اللَّهُمَّ وَبِحَمْدِكَ، أَشْهَدُ أَنْ لَا إِلَهَ إِلَّا أَنْتَ، أَسْتَغْفِرُكَ وَأَتُوبُ إِلَيْكَ

دعاء بعد المذاكرة

اللَّهُمَّ إِنِّي أَسْتَوْدِعُكَ مَا عَلَّمْتَنِيهِ، فَارْدُدْهُ إِلَيَّ عِنْدَ حَاجَتِي إِلَيْهِ، وَلَا تَنْسَنِيهِ يَا رَبَّ الْعَالَمِينَ

ختامًا: نسأل الله أن يجعله **علمًا نافعًا**، وأن يوفقك في الامتحان ويكرمك بالنتيجة **التي ترضاها** يا رب العالمين. آمين
