اللَّهُمَّ لا سَهْلَ إِلَّا ما جَعَلْتَهُ سَهْلًا، وأنتَ تَجْعَلُ الحَزْنَ إذا شِئْتَ سَهْلًا — صلِّ على النبي ﷺ

Part A · Past Exam Questions

أسئلة الدفعات السابقة

1 This is the portion of the uterus that opens into the vagina: — ميدترم 2022–2023

a. Urethra
b. Cervix
c. Uterine tubes
d. Inguinal canal

2 _____ is the ligament that maintains the anteverted position of the uterus. — ميدترم 2022–2023

a. Ovarian ligament
b. Round ligament
c. Broad ligament
d. Cervical ligaments

3 The part of the uterus that lies above the body of the uterus is called: — ميدترم 2022–2023

a. Cervix
b. Fundus
c. Corpus
d. Isthmus

4 The vagina lies between the bladder anteriorly and the rectum posteriorly. (True / False) — ميدترم 2021–2022

a. True
b. False

5 Bartholin's glands open into the: — ميدترم 2021–2022

a. Fallopian tubes and release a secretion that makes sperms motile
b. Uterus and release a lubricating fluid during birth
c. Vestibule and release a lubricating fluid in the vagina
d. Urinary bladder and assist in release of urine

6 Which type of pelvis is rounded in shape, ideal for vaginal delivery and considered the classic female pelvis? — کویز 1 – 2023

a. Gynecoid
b. Android
c. Anthropoid
d. Platypelloid

7 Which of the following organs are included in the internal reproductive system? — کویز 1 – 2023

a. Ovaries, fallopian tubes and clitoris
b. Ovaries, vestibule and Bartholin's glands
c. Fallopian tubes, ovaries, vagina and labia majora
d. Fallopian tubes, uterus, vagina and ovaries

8 Which uterine wall layer is shed during menstruation? — کویز 1 – 2023

a. Endometrium
b. Myometrium
c. Perimetrium
d. Endothelium

9 The protective substance which protects the umbilical cord is called Bartholin's gland. (True / False) — کویز 1 – 2023

a. True
b. False

10 Skene's ducts open on either side of the vaginal orifice. (True / False) — کویز 1 – 2023

a. True
b. False

11 The organ that acts as a safety precaution against foreign bodies entering the uterus: — کویز 1 – 2022

a. Vestibule
b. Vagina
c. Clitoris
d. Cervix

12 _____ is the layer of the uterus that is shed during menstruation. — کویز 1 – 2022

a. Endometrium
b. Myometrium
c. Perimetrium
d. Exometrium

13 The muscle and tissue located between the vaginal opening and the anal canal is called: — کویز 1 – 2022

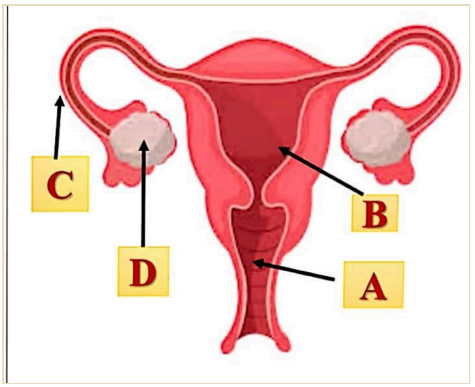

a. Perineum
b. Vulva
c. Labia majora
d. Urethra

14 The functions of the ovaries include secretion of: — کویز 1 – 2022

a. Estrogen and progesterone hormones
b. LH hormone
c. Follicle-stimulating hormone (FSH)
d. Prolactin hormone

15 What is the letter "A" referring to?

كويز 1 – 2021

a. Vagina
b. Cervix
c. Uterus
d. Fallopian tube
e. Ovary

16 What is the letter "B" referring to? (same figure above)

كويز 1 – 2021

a. Vagina
b. Cervix
c. Uterus
d. Fallopian tube
e. Ovary

17 What is the letter "C" referring to? (same figure above)

كويز 1 – 2021

a. Vagina
b. Cervix
c. Uterus
d. Fallopian tube
e. Ovary

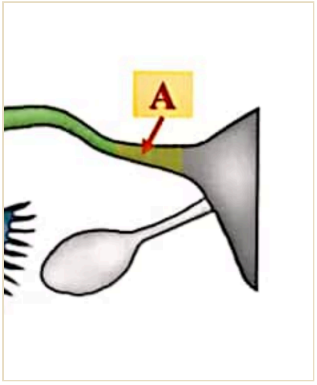

18 What is the letter "D" referring to? (same figure above)

كويز 1 – 2021

a. Vagina
b. Cervix
c. Uterus
d. Fallopian tube
e. Ovary

19 What is the letter "A" referring to?

كويز 1 – 2021

a. Interstitial part
b. Isthmus
c. Ampulla
d. Infundibulum
e. Fimbriae

20 What is the letter "B" referring to? (same figure above) — كويز 1 – 2021

a. Interstitial part
b. Isthmus
c. Ampulla
d. Infundibulum
e. Fimbriae

21 What is the letter "C" referring to? (same figure above) — كويز 1 – 2021

a. Interstitial part
b. Isthmus
c. Ampulla
d. Infundibulum
e. Fimbriae

22 What is the letter "D" referring to? (same figure above) — كويز 1 – 2021

a. Interstitial part
b. Isthmus
c. Ampulla
d. Infundibulum
e. Fimbriae

23 Fallopian tubes are directed from the ovary to the uterus in the following order: — كويز 1 – 2020

a. Interstitial, ampulla, isthmus, infundibulum
b. Infundibulum, ampulla, isthmus, interstitial
c. Interstitial, isthmus, ampulla, infundibulum
d. Isthmus, ampulla, interstitial, infundibulum

24 Which option includes all of the bones that make up the pelvis? — كويز 1 – 2020

a. 2 innominate, sacrum and coccyx
b. 2 ilium, ischium and pubis
c. Innominate, 2 sacrum and coccyx
d. Trochanter, sacrum, coccyx

25 Which structures are finger-like projections at the superior pole of the ovary? — فاينال 2019–2020 (بنك الأسئلة)
تكرر في 2 مصادر

a. Ampulla
b. Corpus luteum
c. Corpus albicans
d. Fimbriae of uterine tube

26 Where in the female reproductive system will you find thousands of follicles? — فاينال 2019–2020 (بنك الأسئلة)
تكرر في 2 مصادر

a. Vagina
b. Fallopian tube
c. Ovaries
d. Uterus

27 The entrance to the uterus is also known as the: تكرر في 2 مصادر — فاينال 2019–2020 (بنك الأسئلة)

a. Ovary
b. Cervix
c. Fallopian tube
d. Vagina

28 Which structures are finger-like projections at the superior pole of the ovary? — أسئلة سابقة
تكرر في 2 مصادر

a. Ampulla
b. Corpus luteum
c. Corpus albicans
d. Fimbriae of uterine tube

29 Where in the female reproductive system will you find thousands of follicles? أسئلة سابقة

تكرر في 2 مصادر

a. Vagina
b. Fallopian tube
c. Ovaries
d. Uterus

30 The entrance to the uterus is also known as the: تكرر في 2 مصادر أسئلة سابقة

a. Ovary
b. Cervix
c. Fallopian tube
d. Vagina

31 Which of the following is posterior to the vagina? أسئلة سابقة

a. Urethra and bladder
b. Perineal body and rectum
c. Pelvic floor muscles
d. The vulva

32 The muscle and tissue located between the vaginal opening and anal canal is called: كويز تجريبي (فورم)

a. Perineum
b. Vulva
c. Labia majora
d. Urethra

33 Which of the following are the internal organs of the female reproductive system? كويز تجريبي (فورم)

a. Uterus, bladder, vagina and appendix
b. Vagina, cervix, uterus, fallopian tubes and ovaries
c. Cervix, uterus, fallopian tubes and ovaries
d. Vagina, cervix, bladder, uterus, fallopian tubes and ovaries

34 Which hormone(s) is/are secreted from the ovaries? كويز تجريبي (فورم)

a. Estrogen and progesterone
b. Luteinizing hormone (LH)
c. Follicle-stimulating hormone (FSH)
d. Prolactin

35 The layer of the uterine wall that is shed during menstruation is: كويز تجريبي (فورم)

a. Myometrium
b. Perimetrium
c. Endothelium
d. Endometrium

Part B · NCLEX-Style Practice

أسئلة على طريقة NCLEX (إضافة)

N1 A client asks where the ovum is usually fertilized. The nurse's best response is: NCLEX

a. In the fimbriae
b. In the ampulla of the fallopian tube
c. In the isthmus
d. In the uterine cavity

N2 During a pelvic exam, the nurse explains which structure prevents ascending infection into the uterus. Which is correct? NCLEX

a. Vestibule
b. Cervix with its mucus plug
c. Labia minora
d. Hymen

N3 Which pelvic type is most favorable for a vaginal birth? NCLEX

a. Android
b. Anthropoid
c. Gynecoid
d. Platypelloid

N4 Select ALL structures that belong to the internal female reproductive organs. SELECT ALL

a. Vagina
b. Uterus
c. Fallopian tubes
d. Ovaries
e. Labia majora
f. Bartholin's glands

N5 A postpartum client has a perineal laceration. The nurse knows the perineum is located between: NCLEX

a. The clitoris and the urethra
b. The vaginal opening and the anus
c. The labia majora and labia minora
d. The urethra and the vagina

N6 Which uterine layer is responsible for contractions during labor? NCLEX

a. Endometrium
b. Myometrium
c. Perimetrium
d. Decidua

N7 Which ligament keeps the uterus in its anteverted position? NCLEX

a. Broad ligament
b. Ovarian ligament
c. Round ligament
d. Infundibulopelvic ligament

N8 Bartholin's glands secrete mucus that: NCLEX

a. Makes sperm motile in the tube
b. Lubricates the vaginal introitus
c. Protects the umbilical cord
d. Is released during urination

Part C · Quizlet Flashcards

كروت مراجعة سريعة

غطّي العمود الأبيض بورقة واختبر نفسك: شوف المصطلح وقول التعريف.

Ampulla	Widest, longest part of the tube — usual site of fertilization	**Isthmus (tube)**	Narrow part of the tube next to the uterus
Infundibulum / Fimbriae	Funnel end of the tube with finger-like fimbriae over the ovary	**Order of the tube (ovary → uterus)**	Infundibulum → Ampulla → Isthmus → Interstitial
Endometrium	Inner uterine layer shed during menstruation	**Myometrium**	Muscle layer — contractions of labor
Fundus	Part of the uterus above the openings of the tubes / above the body	**Cervix**	Lower part of the uterus opening into the vagina; barrier against infection
Perineum	Tissue between vaginal opening and anus	**Bartholin's glands**	Open into vestibule; lubricate the vagina
Skene's glands	Paraurethral glands that open on either side of the urethral meatus	**Gynecoid pelvis**	Rounded; classic female pelvis; best for vaginal birth

Round ligament	Maintains anteversion of the uterus
Pelvis bones	2 innominate (ilium, ischium, pubis) + sacrum + coccyx

Answer Key

الإجابات

1. b — Cervix

2. b — Round ligament

3. b — Fundus

4. a — True

5. c — Vestibule and release a lubricating fluid in the vagina

6. a — Gynecoid

7. d — Fallopian tubes, uterus, vagina and ovaries

8. a — Endometrium

9. b — False

10. b — False

11. d — Cervix

12. a — Endometrium

13. a — Perineum

14. a — Estrogen and progesterone hormones

15. a — Vagina

16. c — Uterus

17. d — Fallopian tube

18. c — Ovary

19. b — Isthmus

20. c — Ampulla

21. d — Infundibulum

22. c — Fimbriae

23. b — Infundibulum, ampulla, isthmus, interstitial

24. a — 2 innominate, sacrum and coccyx

25. d — Fimbriae of uterine tube

26. c — Ovaries

27. b — Cervix

28. d — Fimbriae of uterine tube

29. c — Ovaries

30. b — Cervix

31. b — Perineal body and rectum

32. a — Perineum

33. b — Vagina, cervix, uterus, fallopian tubes and ovaries

34. a — Estrogen and progesterone

35. d — Endometrium

N1. b — In the ampulla of the fallopian tube
The ampulla is the widest and longest part of the tube and the usual site of fertilization.

N2. b — Cervix with its mucus plug
The cervix and its mucus act as a barrier to foreign bodies and organisms entering the uterus.

N3. c — Gynecoid
The gynecoid pelvis has a rounded inlet and adequate diameters — the classic female pelvis.

N4. a, b, c, d — Vagina; Uterus; Fallopian tubes; Ovaries
Internal organs: vagina, uterus, tubes and ovaries. Labia and Bartholin's glands are external genitalia.

N5. b — The vaginal opening and the anus
The perineal body lies between the vaginal orifice anteriorly and the anal canal posteriorly.

N6. b — Myometrium
The myometrium is the thick smooth-muscle layer that contracts during labor and compresses vessels after birth.

N7. c — Round ligament
The round ligaments pull the fundus forward, maintaining anteversion.

N8. b — Lubricates the vaginal introitus
Bartholin's glands open into the vestibule and lubricate the vagina during sexual arousal.
